Abstract

This project aims to develop a user-friendly donation website that makes it easy for users to donate and allows them to set up automatic monthly donations. We dedicate this donation to supporting vulnerable and special groups, including the elderly, children, and people with disabilities. Furthermore, the website will showcase real stories of caring individuals helping vulnerable groups, charitable events organized, and how donations are used. Administrators can also easily retrieve donation history and update or upload any event through the backend. We hope this website will make the donation process simpler and more transparent, encouraging more people to participate in helping these vulnerable groups.

1.1 Overview

The Donation System for Caring Individuals is a web-based platform developed and operated by our own charity, dedicated to serving those who wish to help those in need. Unlike third-party platforms, we are a direct-service charity that manages the entire donation process in-house to ensure trust and transparency. Our platform is designed to streamline and digitize the donation process and focuses on meeting the specific needs of those who contribute, such as medical supplies, nutritional supplements, home renovations, and daily necessities. The system aims to create a transparent, user-friendly, and secure channel for donors to donate funds or in-kind, while enabling recipients or our charity administrators to manage, monitor, and report on donation activity. The platform will support multiple payment methods and feature two donation options: one-time and monthly. Furthermore, we offer goal tracking, identity verification, and the distribution of thank-you badges via email. User registration, donation history, and real-time updates are also included.

1.2 Project Objectives

- **To establish a secure, transparent donation platform for donor tracking, multiple donation types, and real-time campaign updates.**

The project aims to create a safe, transparent online donation system to overcome the lack of trust and inconvenience often found in traditional charities. The site will accept various donations, including money, clothing, and food, reflecting donor preferences. Every donor will get a dedicated tracking page to see their donation history and accomplishments. The system will update charitable activities in real time so donors can see how their money is used. Donors will also be able to monitor the supply of their donated products. This approach increases transparency and builds trust and involvement between the organization and donors.

- **To increase charitable giving through a convenient system and raise community awareness/engagement in elderly care via storytelling and updates.**

This project is doubly designed to make the process of donation more modernized by the use of technology and to create the feeling of emotional involvement with the narratives. First, we intend to create a very convenient online donation system, which combines different ways of paying and simplifies the process of donating. This system will result in more and more charitable giving because it removes the high barricade that exists in philanthropic participation. Second, we will concentrate on the elderly care. Rather than displaying the donations as figures, we will convert them into a figure of life that donors will get updated on and illustrate effective stories in real-time. Donors will be given the chance to see video clips and progress reports that demonstrate how their donation will directly enhance the life of the elderly beneficiaries in terms of daily needs and long-term viability. This ease of operation and transparency of emotions are meant to tear down the walls of trust and invite the masses to move beyond the act of

passive spectators and become integral players in the process of providing care to the aged, thus strengthening the impact of the community.

- **To develop a centralised digital platform for admin to manage donations and system.**

The objective we are working on is to develop an efficient administrative system that combines all processes into a single platform and to improve the overall effectiveness, dependability, and transparency of contribution operations. This system's primary goal is to automate the management process so that donor records, payments, and donation histories may be handled with less manual labour and human mistake. Technology enhances administrative efficiency and collaboration by enabling administrators to track contribution activity, staff performance, and fundraising progress in real time through an integrated dashboard. Additionally, by offering digital receipts, donation progress bars, and comprehensive transaction histories to foster donor trust, the system encourages accountability and transparency. By enabling role-based access, user customisation and management of donor accomplishments and point incentives, it also improves administrative control. Additionally, by giving administrators the ability to control payment schedules, amend statuses, and automatically create PDF receipts, the system guarantees the safe and organised processing of recurrent payments. All things considered, this administrative system helps create a transparent, orderly, and long-lasting environment for managing donations.

1.3 Target Users

1. **Public:**

Individuals who wish to donate money or items. These individuals can use the system to make donations.

2. **Beneficiaries:**

Individuals or groups in need of donations (e.g., orphans, the elderly, and people with disabilities). Individuals or groups in need of donations (e.g., orphans, the elderly, and people with disabilities).

3. **Admins/Staff (Charities):**

System administrators are responsible for managing and approving donation requests and donation campaigns.

1.4 Project Scope

The scope of the project focuses on developing an effective Donation Management System and this system aims to provide the public with a convenient and transparent online platform to make the donation for those people in need. This website develops using HTML, CSS, JavaScript, and PHP and it will include multiple function for both donors and administrators. The system offers a simple and safe means for the public to donate money or necessities, supporting a variety of branches such senior homes, orphanages, and facilities for individuals with impairments.

First, the donors will be able to select between monthly recurring donations and one-time donations using the system. The system will immediately create a digital certificate and receipt following each successful transaction, which will be emailed straight to the donor. Additionally, donors can change the dates of deductions, suspend, or cancel their subscriptions, examine and manage their recurring gift plans, and download monthly PDF receipts by logging in. For unique fundraising situations, the system also offers a donation progress bar that lets donors see the entire amount raised in real time.

Second, apart from monetary contributions made online, the organisation also takes gifts of tangible items like food, home goods, and daily necessities, however, these are only gathered at actual charity events that the centre organises. In order to donate items, donors must physically attend these offline events and complete a donation form that is provided by on-site staff. The staff then manually records the donated items, which are subsequently updated into the admin section of the system for tracking and reporting purposes. In addition

to encouraging community involvement, this feature gives contributors another avenue to assist charitable initiatives outside of cash.

Third, only registered users are permitted to make donations and access personal features like reward points, recurring plans, and donation history in order to preserve security and system integrity. Registered users can also make a donation using the quick donation button. The system will then direct the user to the payment page, allowing them to select the desired payment amount and currency. We offer a variety of payment options, including credit/debit cards, e-wallets, and bank account transfers. Registered users can access their donation history through the "My History" page. Furthermore, since our website supports e-wallets and bank transfers, registered users can select and link their most frequently used e-wallets or bank accounts, such as Touch n Go, CIMB Bank and Public Bank. Linking their e-wallet or bank account allows them to make quick donations without entering any information. They can also subscribe to a monthly payment plan, which automatically deducts funds from their account each month. This system also has a reward system and gamification. Each donation made by registered donors earns them points, which can then be redeemed for presents or handicrafts created by individuals with disabilities.

For unregistered user are unable to donate but they are still able to view public pages such as Home, About Us, Contact Us, Activities, News, and History. A pop-up alert will show up to advise unregistered visitors to register or log in before donating. This architecture maintains accuracy, traceability, and data safety by ensuring that every transaction is safely connected to verified accounts.

Forth, secure login, contact admin for password recovery and an extensive dashboard for tracking all activity are all features of the administrator module. Administrators have the ability to manage staff and donors, post event details, publish announcements or news, and start or modify special donation campaigns. Additionally, they can produce monthly reports for transaction and donation analysis, guaranteeing accountability and openness. Staff accounts help with offline event management, activity updates, and donation verification.

Technically, MySQL serves as the primary database and HTML, CSS, JavaScript, and PHP are used in the system's development. It accepts a variety of payment methods, including local bank transfers -, e-wallets (Touch 'n Go,), and credit/debit cards. To preserve dependability and donor confidence, all transactions are handled securely, and digital receipts are produced automatically.

Last but not least, the online financial donations are the system's main focus. As the system grows, features like automated offline data entry, refund processing are not yet available but may be implemented in future updates as the system expands.

2.1 Primary Study / Literature Research

Primary Study / Literature Research

Website 1

URL: <https://www.greenpeace.org/malaysia/>

The website is a local Malaysian donation site that has a modern, usable interface. The homepage features a white and beige colour scheme, creating a professional and fresh look. The rich use of images creates an engaging visual experience. Moreover, the homepage has a marked navigation bar that can be used by users to reach major sections quickly. The general structure is succinct, and the main points are brought to the fore. The users can view the information about the donation organization, projects, calls to action, related news, and the method of making payments. The site is very easy to navigate, so that you can decide on which donation projects you want; users can also access news and make donations, all within a single site.

Figure 4 : Home page (part 4)

Analysis of Homepage Functionality

Figures 1 to 4 show the full coverage of the homepage with introduction, organization facts, projects to donate, related news, and also display a lot of information easily understandable. The first thing that attracts the attention of the visitor is the full-screen banner with its short, convincing tagline and the call to action that makes the person want to take immediate action. Following a downward scroll, important statistical figures about the organization are found. In the middle, a project highlights section appears, which demonstrates some important projects with graphics. A subscription and news preview are at the bottom of the page to indicate re-use of information.

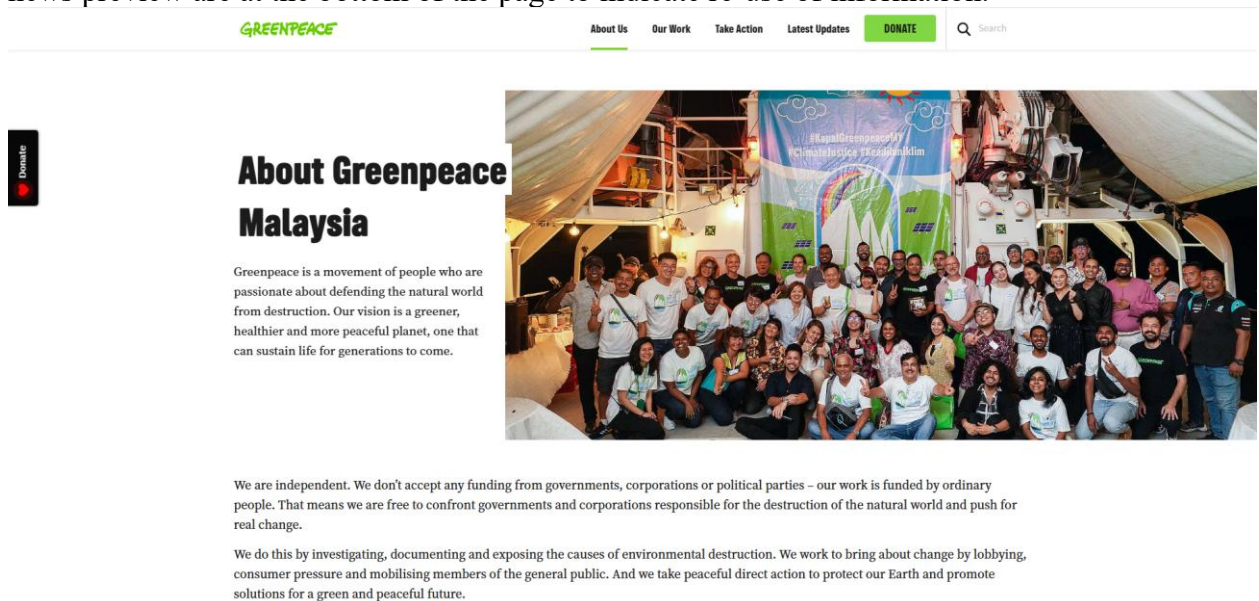

Figure 5 : About Us page(Organization Introduction)

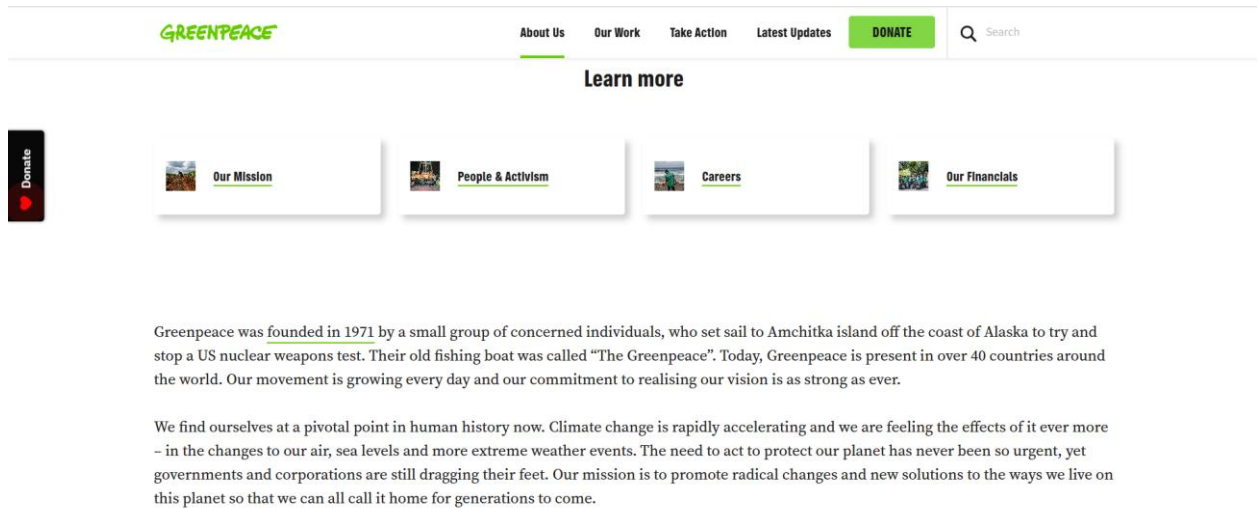

Figure 6 : About Us page(Mission, People and Activism, Careers and Our Financial)

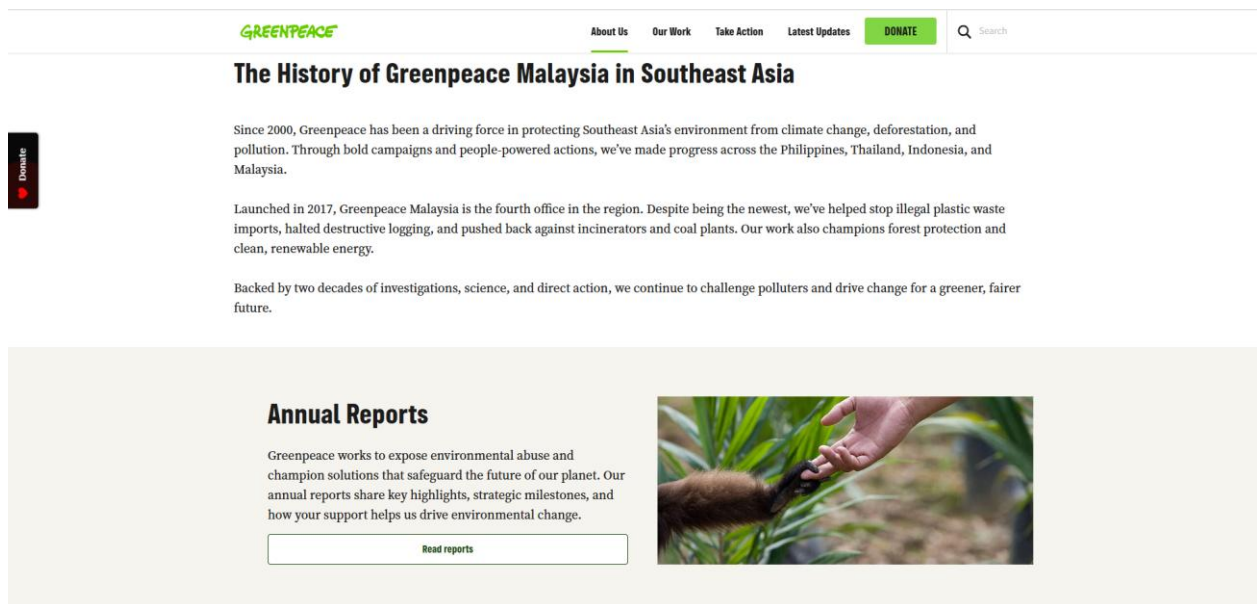

Figure 7 : About Us page(History and Annual Report)

Analysis of About Us Section

All the information on the page About Us is depicted in figures 5-7. The page has a layered structure where team introduction, organizational mission, development history, and annual reports are given in a top-down format.

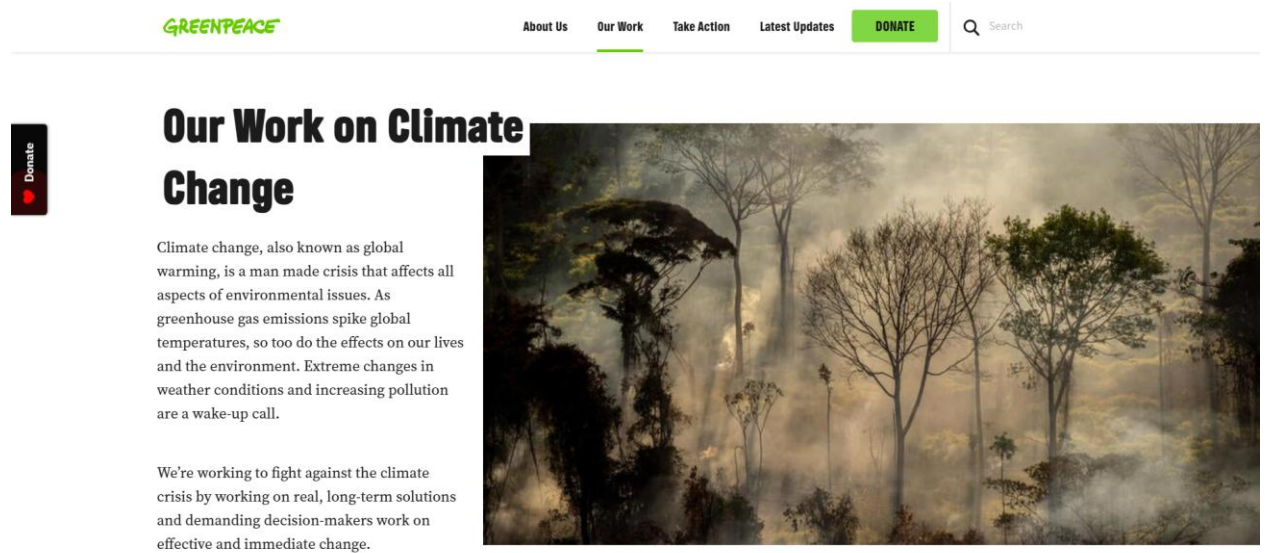

Figure 8 : Our Work

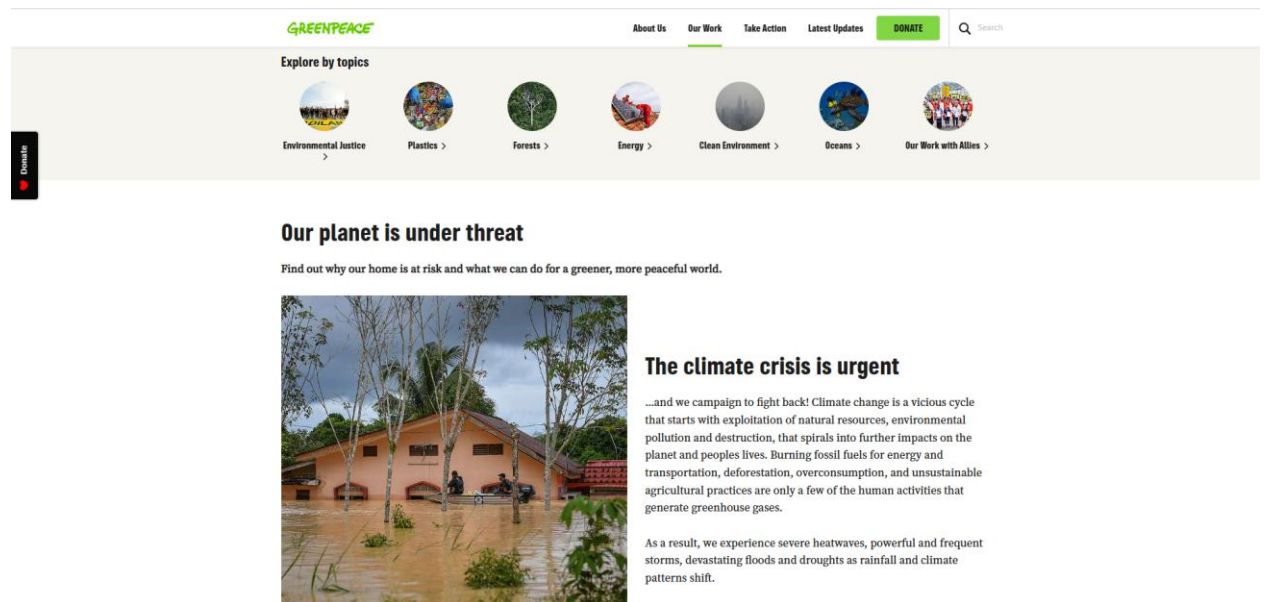

Figure 9 : Our Work (topic and story)

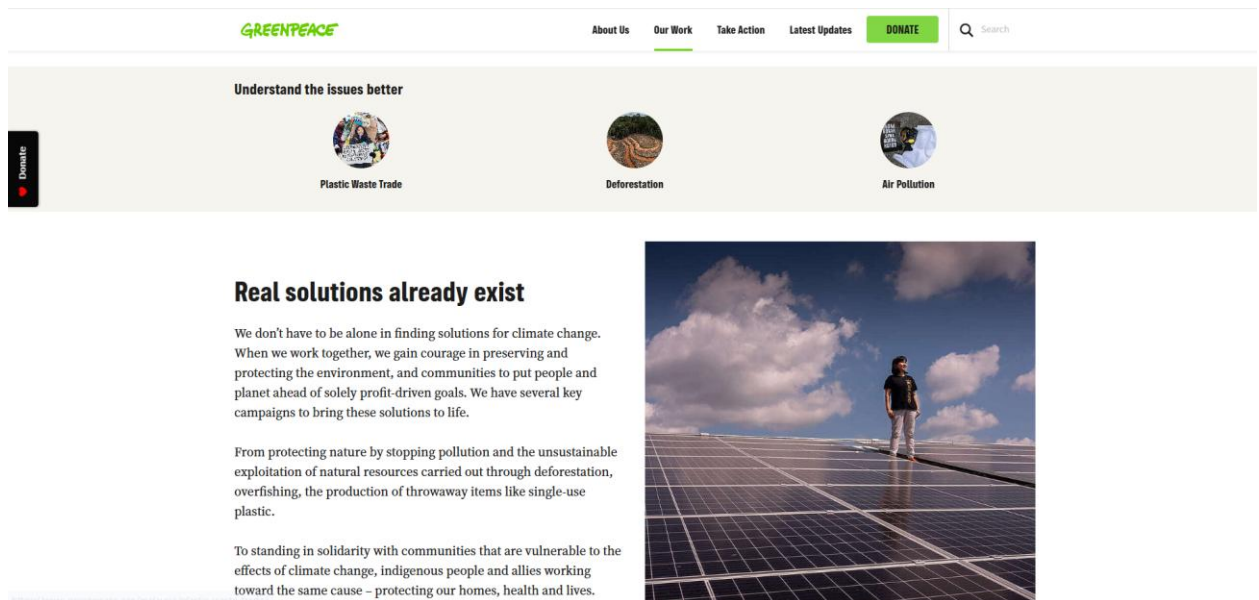

Figure 10 : Our Work (Reason and solutions)

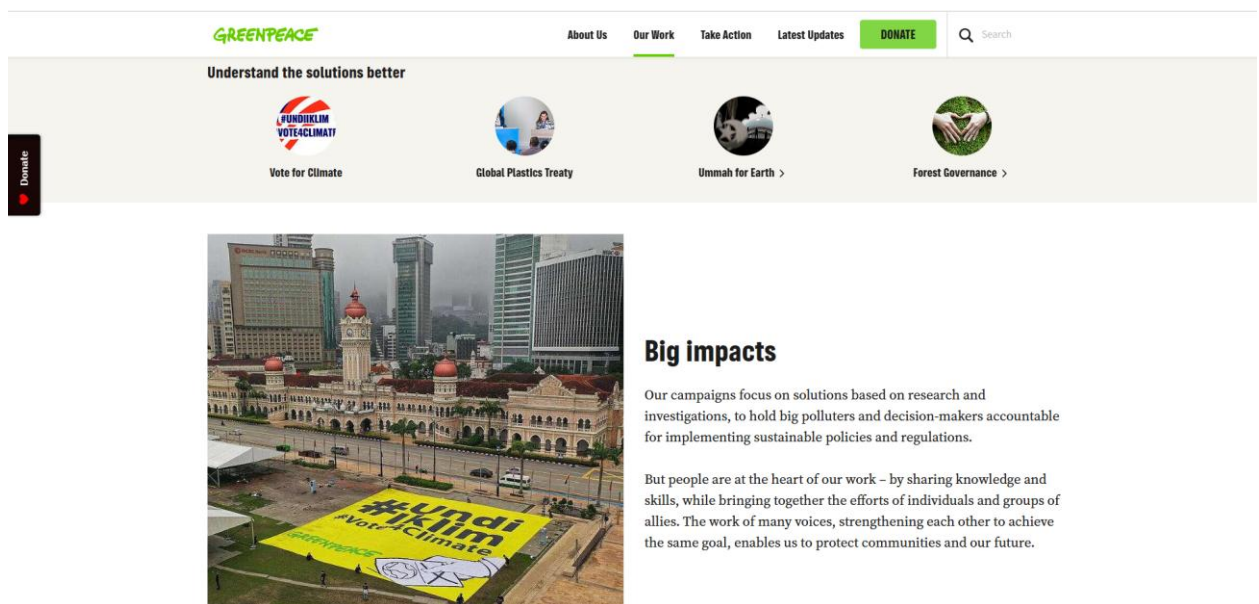

Figure 11 : Our Work (Solutions and impacts)

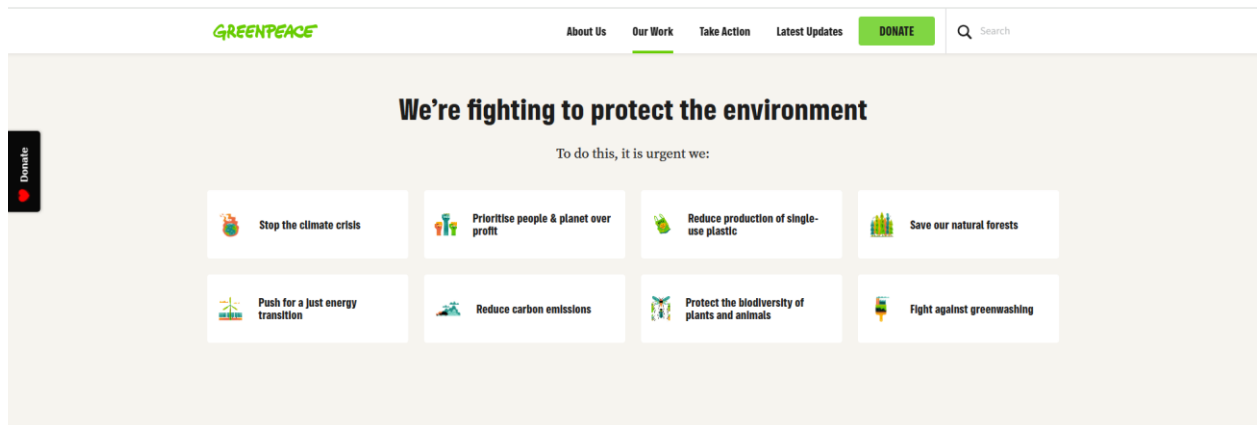

Figure 12 : Our Work (What we need?)

Analysis of Our Work Section

The "Our Work" website is shown in Figures 8 to 12. The website uses a hierarchical layout, organized from top to bottom by work content, theme, cause, solution, impact, and project. Each project is presented as a card, with key information presented on the page: a cover image, project name, sub-section description, and some progress information. Clicking on the project details page reveals a more detailed project description, implementation photos, beneficiary stories, and funding status.

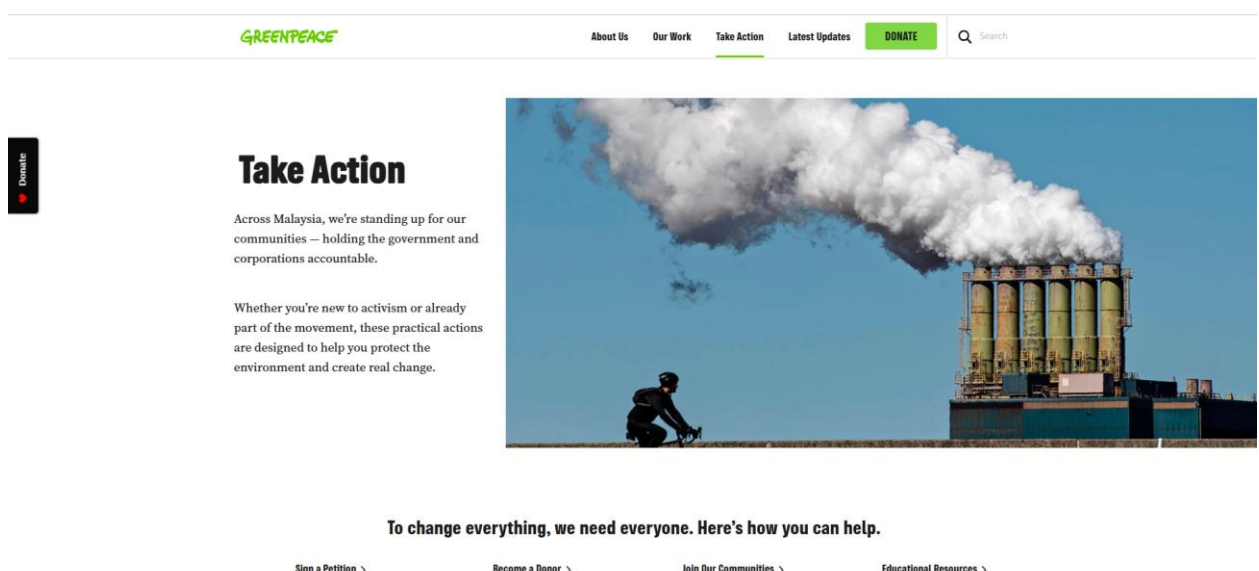

Figure 13 : Take Action (Introduction)

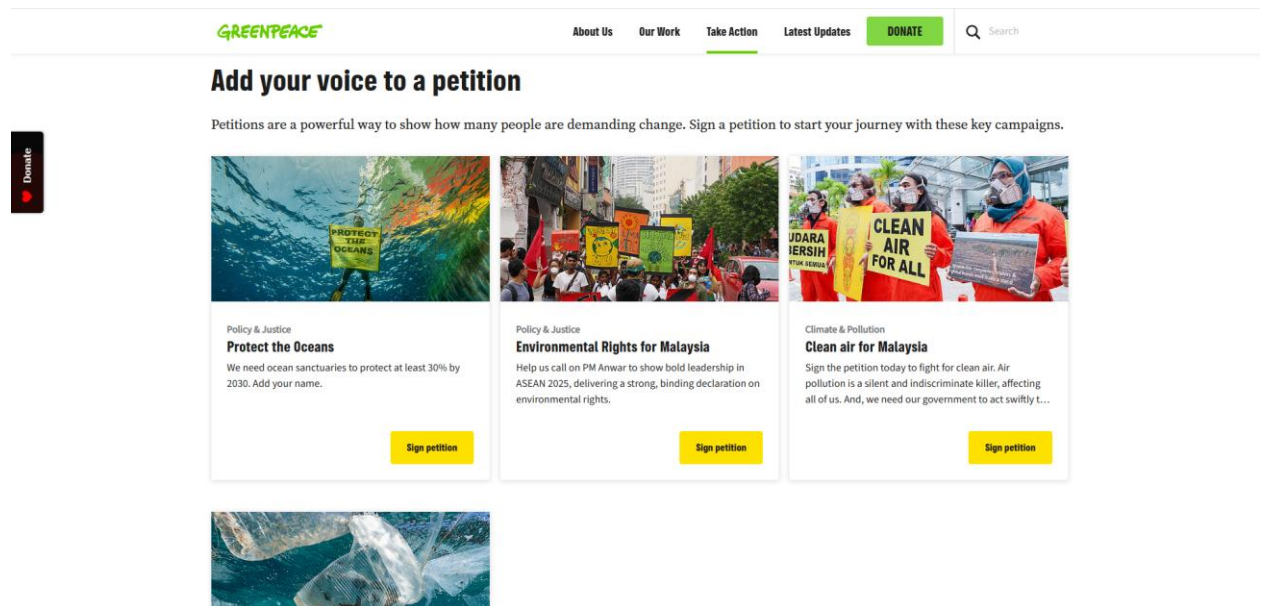

Figure 14 : Take Action (Example 1)

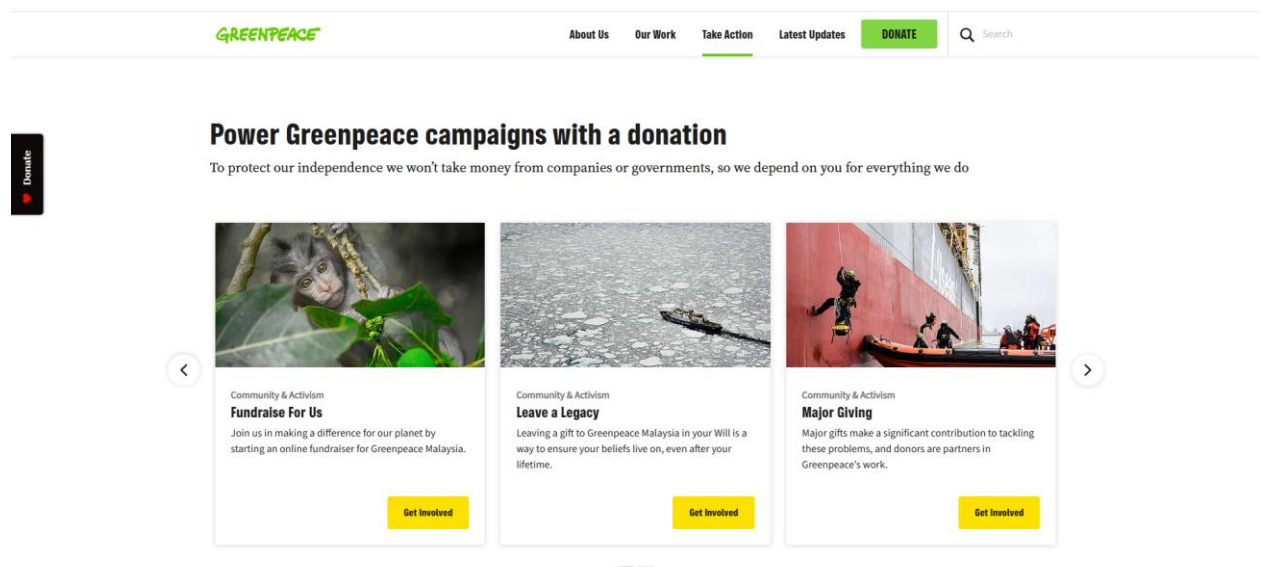

Figure 15 : Take Action (Example 2)

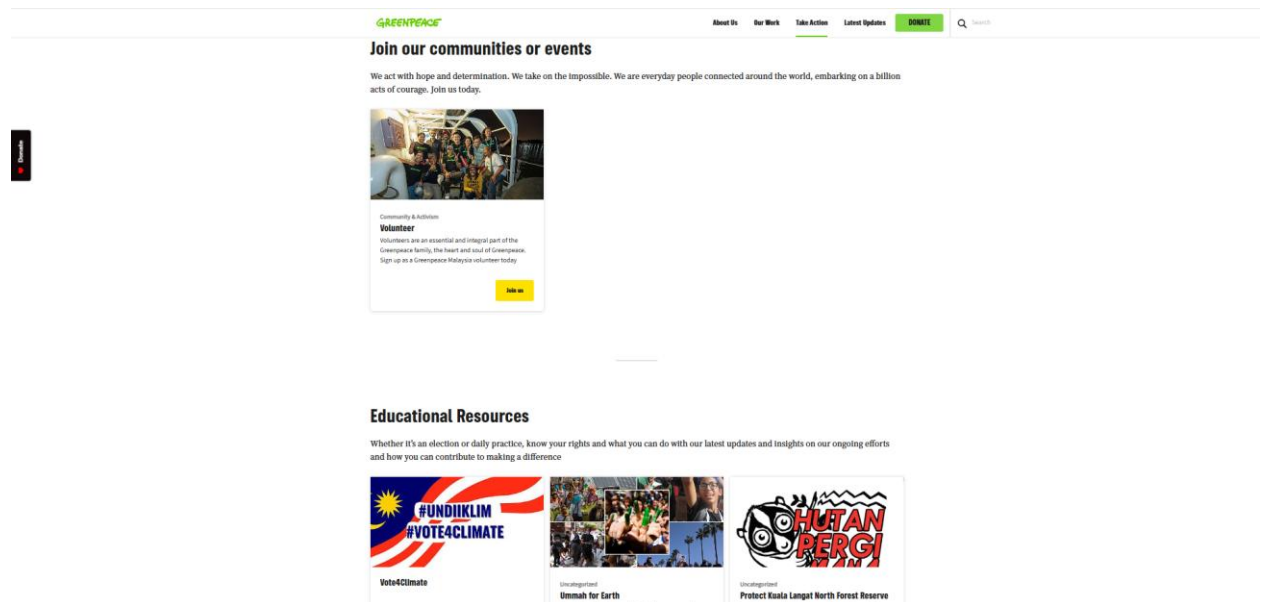

Figure 16 : Take Action (Join and Educational Resources)

Analysis of the "Take Action" section

Figures 13 through 16 show all the data of the part in which actions are described. This part suggests several means of action, including donating, volunteering, advocacy, and in-kind donations, all having their specific display area. Every action option comes with a short caption that explains the effect of the specific action, engaging the users more. The same kind of presentation, a top-down approach, is also used in this section.

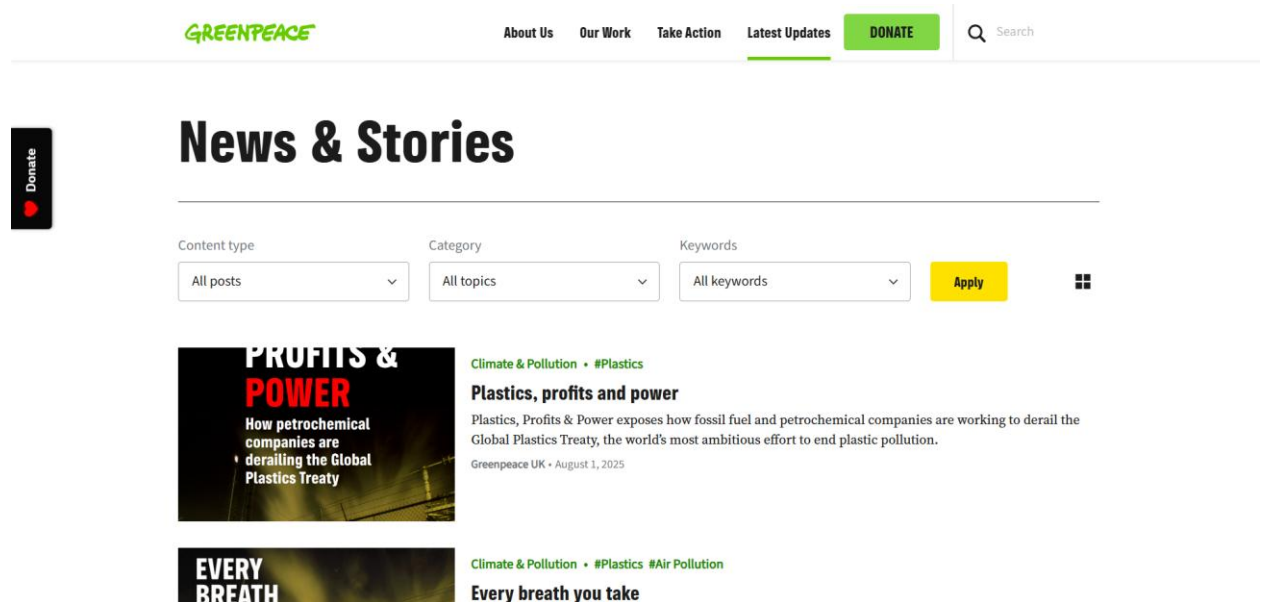

Figure 17 : News and Stories

Analysis of the News and Stories Section

In Figure 17, the section is referred to as the News and Stories. It presents a cut-down of other related news items. Users have an opportunity to click on an image or topic in order to view detailed information available on the corresponding news item.

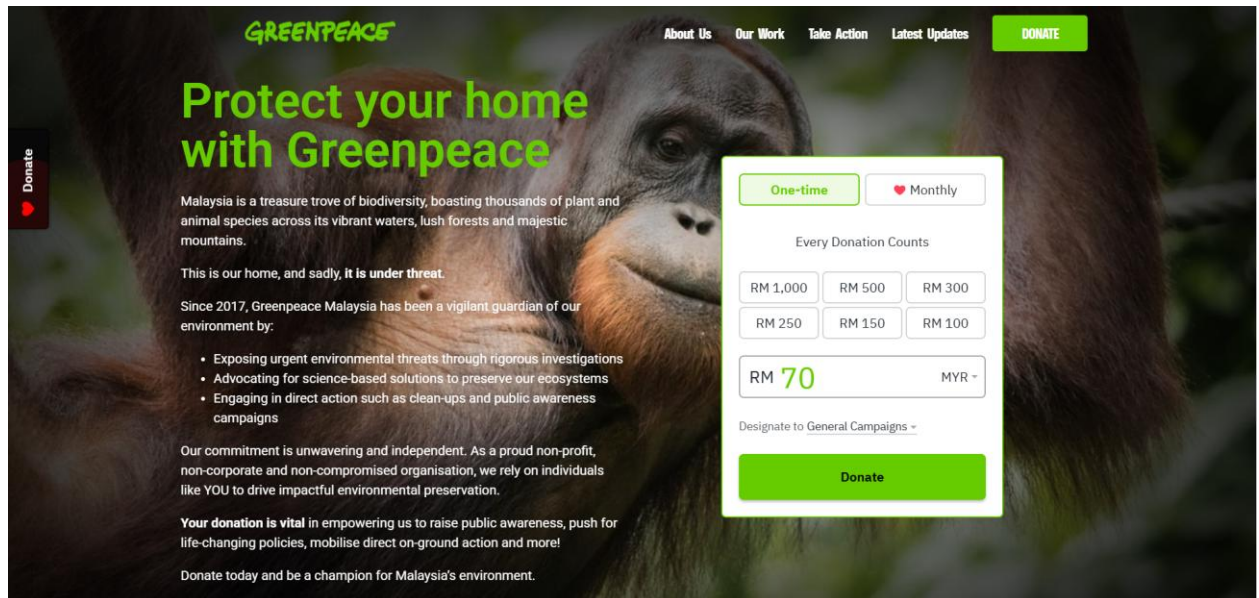

Figure 18 : Payment (Introduction and Donate Page)

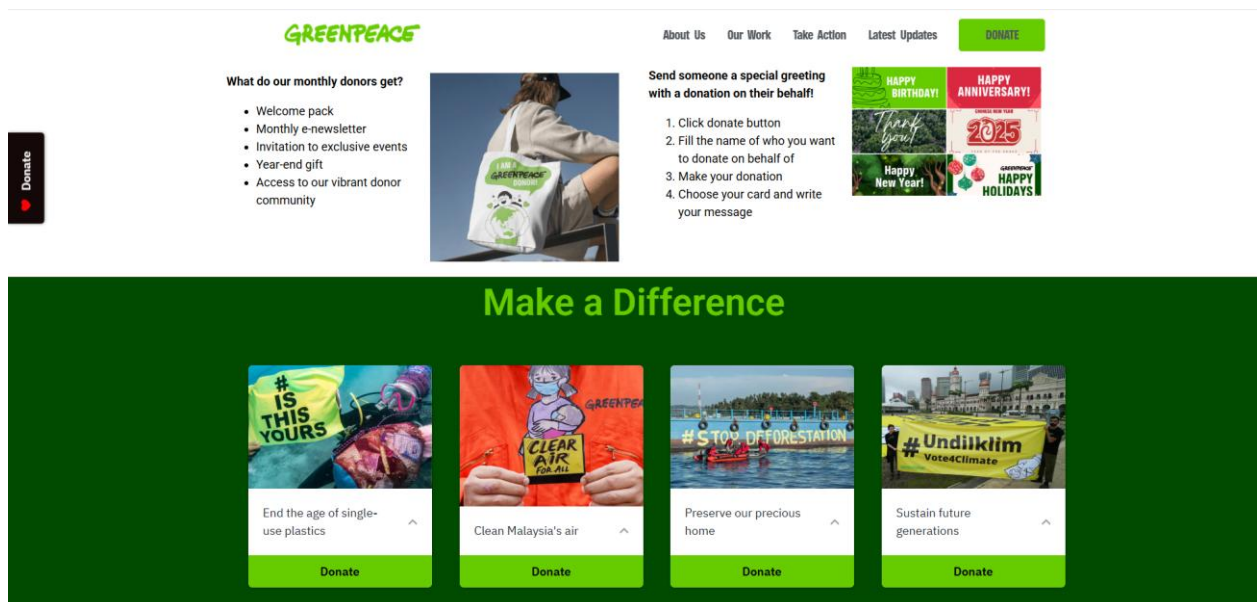

Figure 19 : Payment (Donation prizes, greeting cards, donation options)

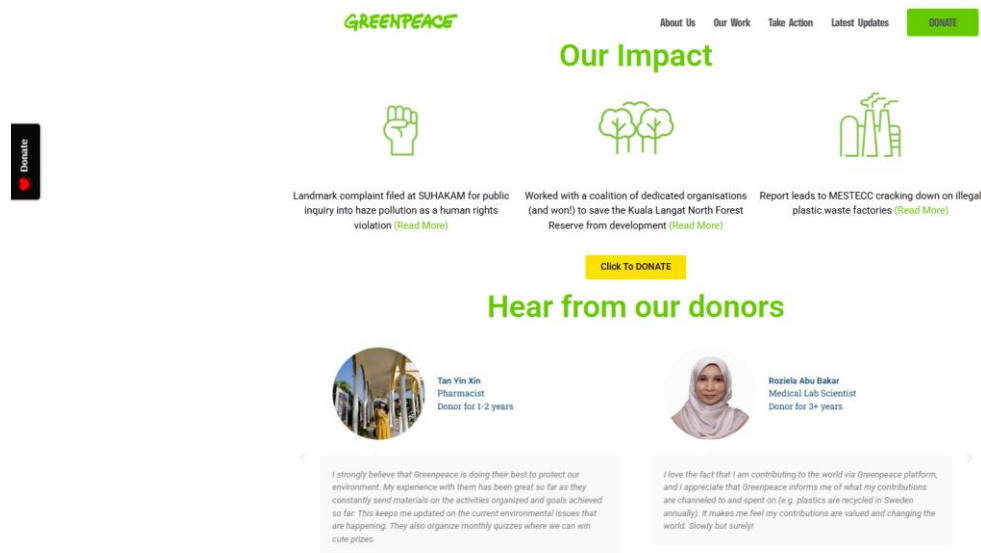

Figure 20 : Payment (Impact and Donors)

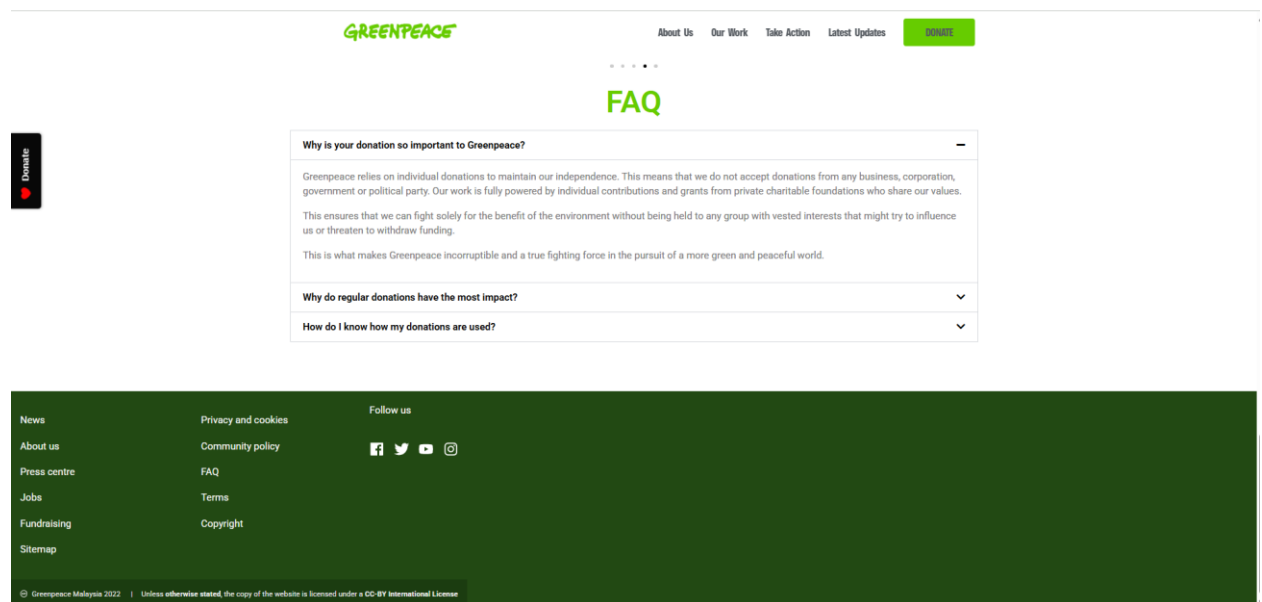

Figure 21 : Payment (FAQ)

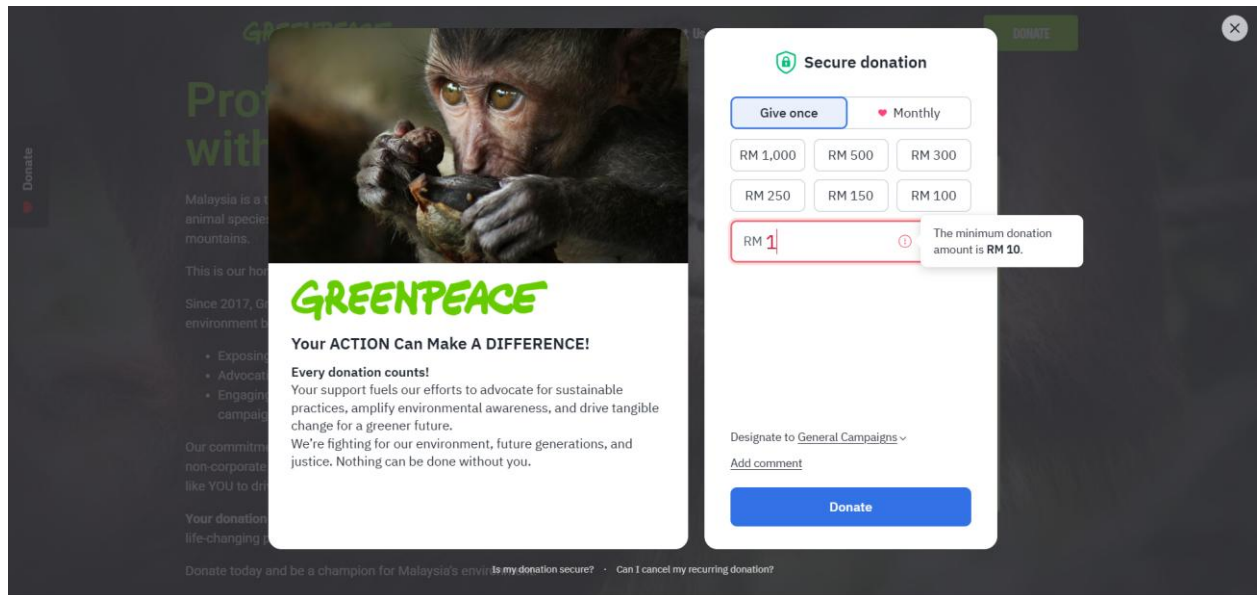

Figure 22 : Payment (Secure Donation)

The page in particular imposes a volumetric limit of donation; no donation can be small than RM10.

Figure 25 : Payment (Payment ways)

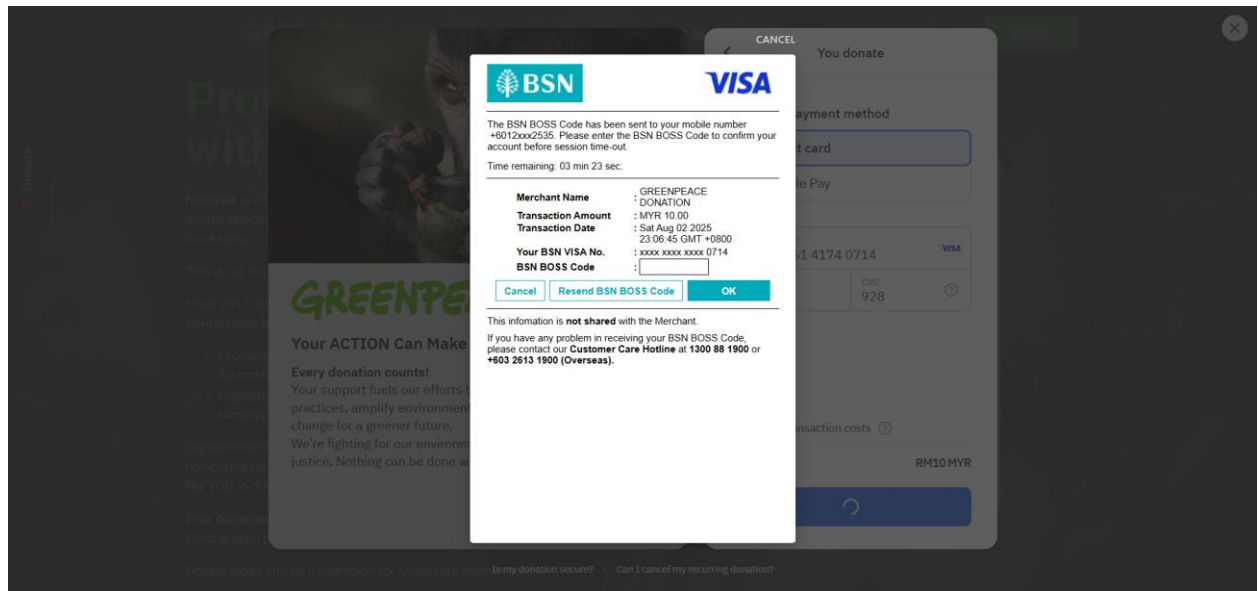

Figure 26 : Payment (security code)

A security code is also featured on this page so as to make sure that the person making the request is actually the user.

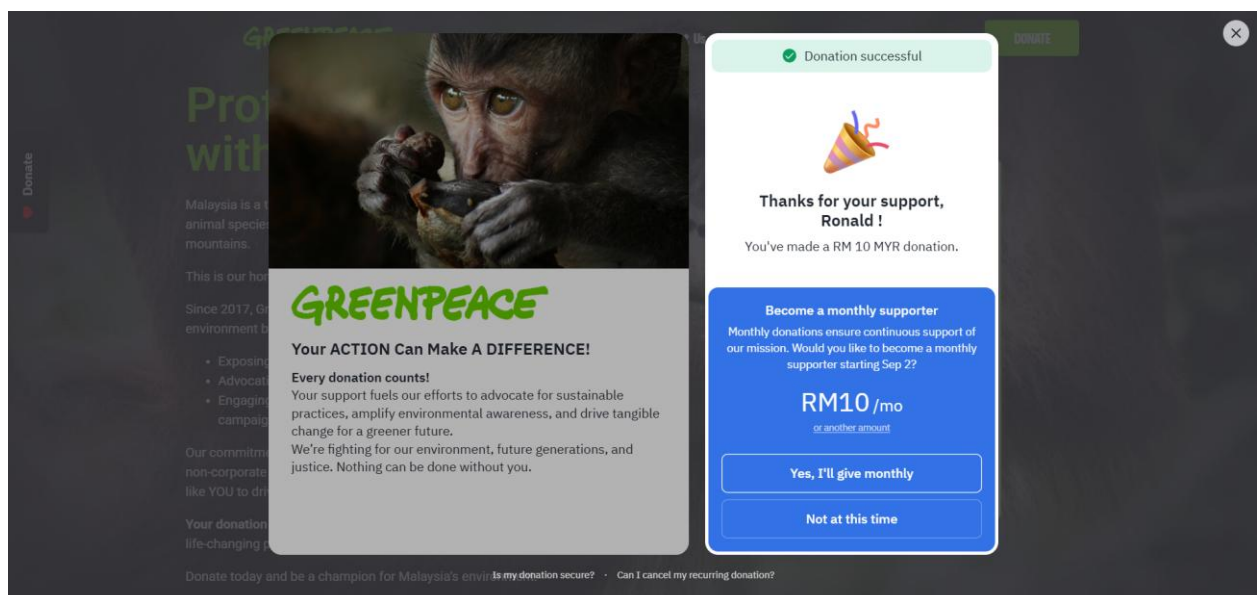

Figure 27 : Payment (Finish Payment 1)

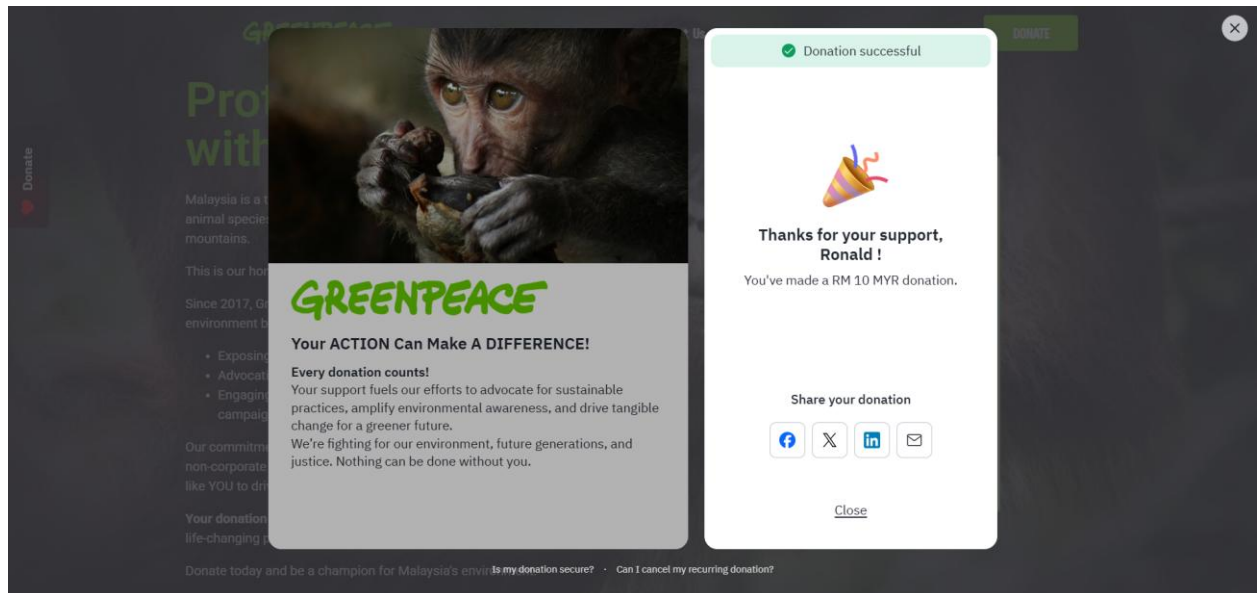

Figure 28 : Payment (Finish Payment 2)

Analysis of Payment Section

One of the central functional modules of the website is the payment system, which is depicted in figures 17 through 28. The site will provide two ways of donation, which are a one-time donation and a monthly donation. Such data as stories, prizes, options, and donors could be found on this page.

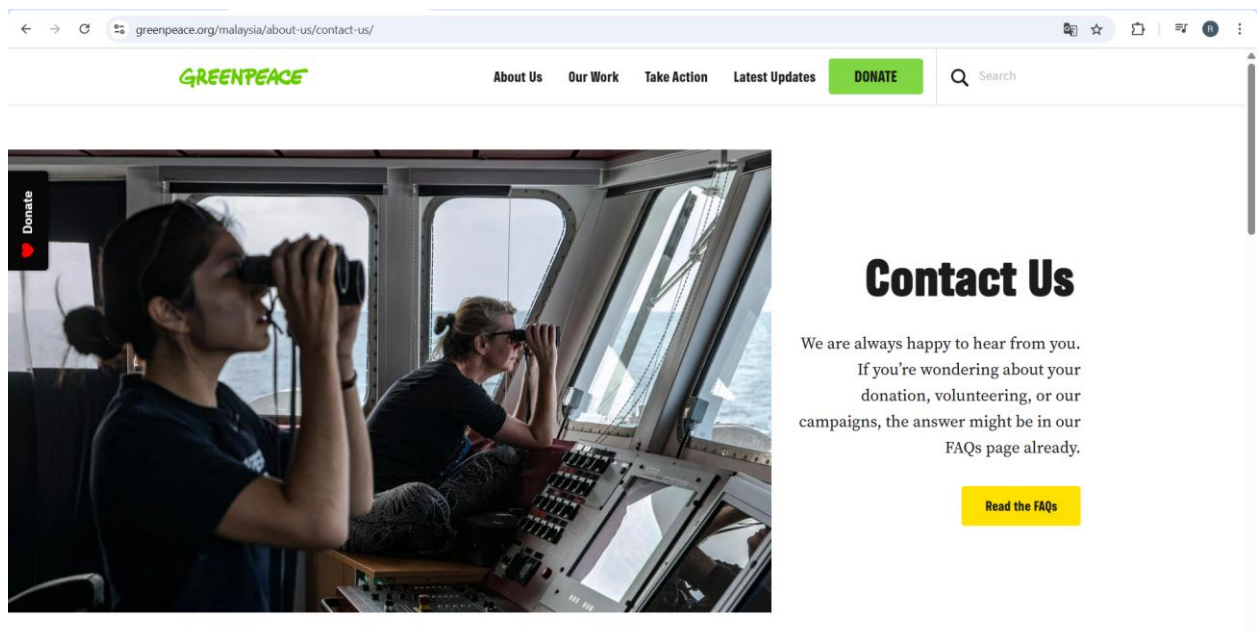

Figure 29 : Contact Us Part 1

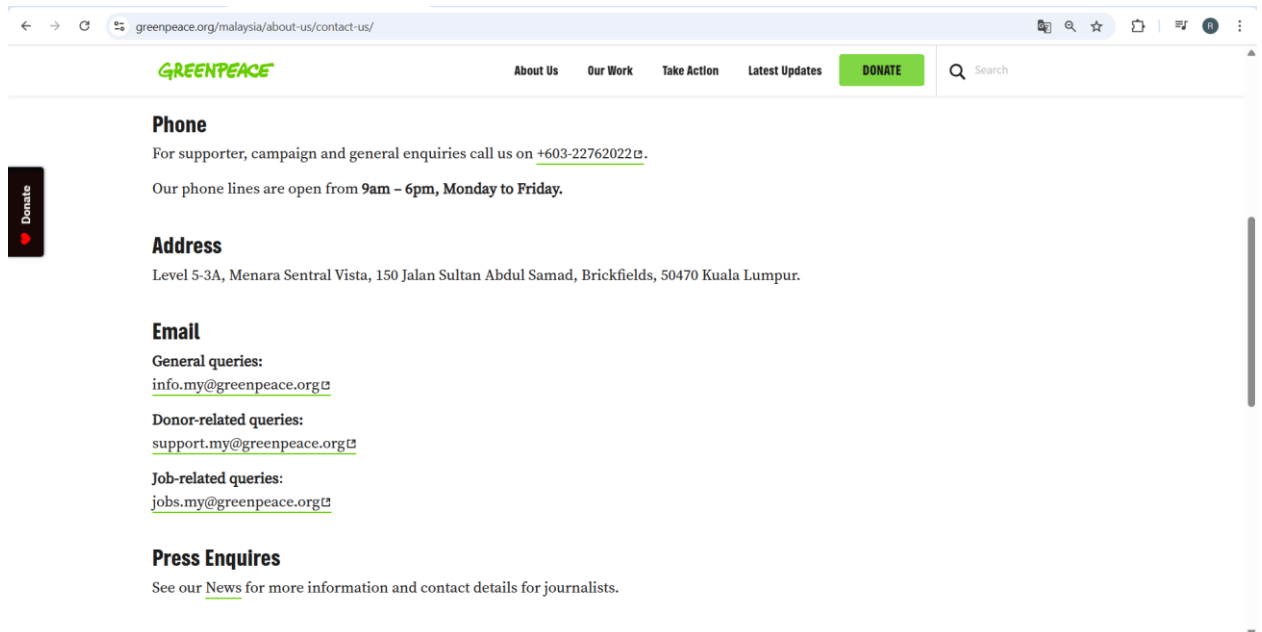

Figure 30 : Contact Us Part 2

Analysis of Contact Us

Figures 29 and 30 show the organization's contact information, including mobile phone, address, and email. Every user can contact the organization through these methods.

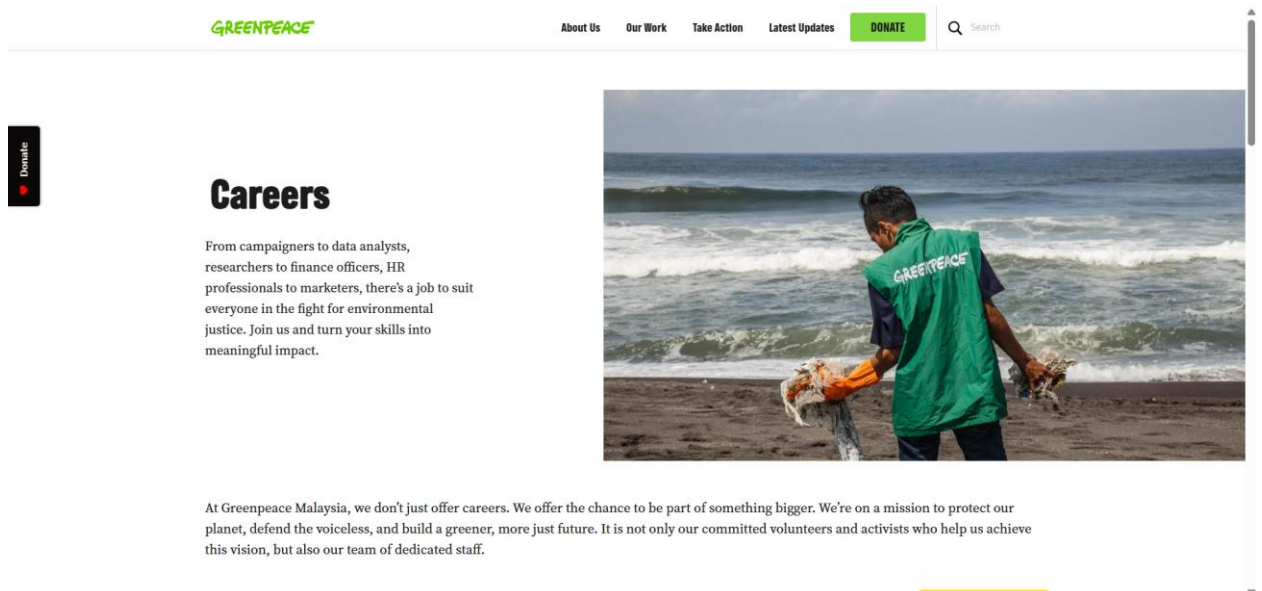

Figure 31 : Careers Part 1

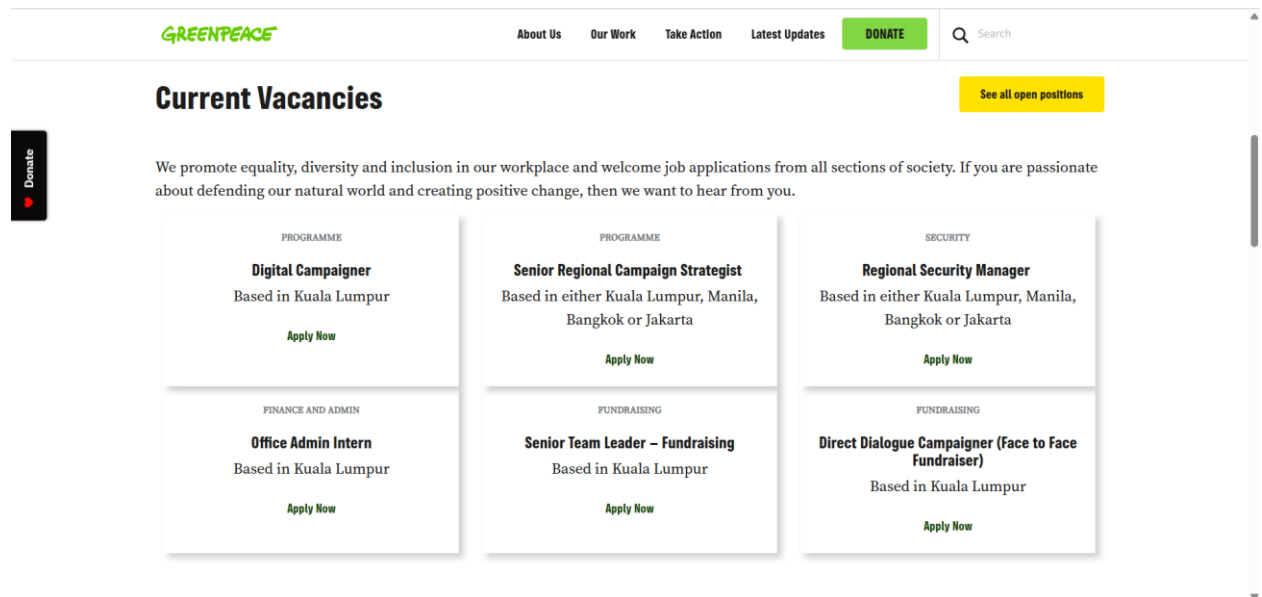

Figure 32 : Careers Part 2

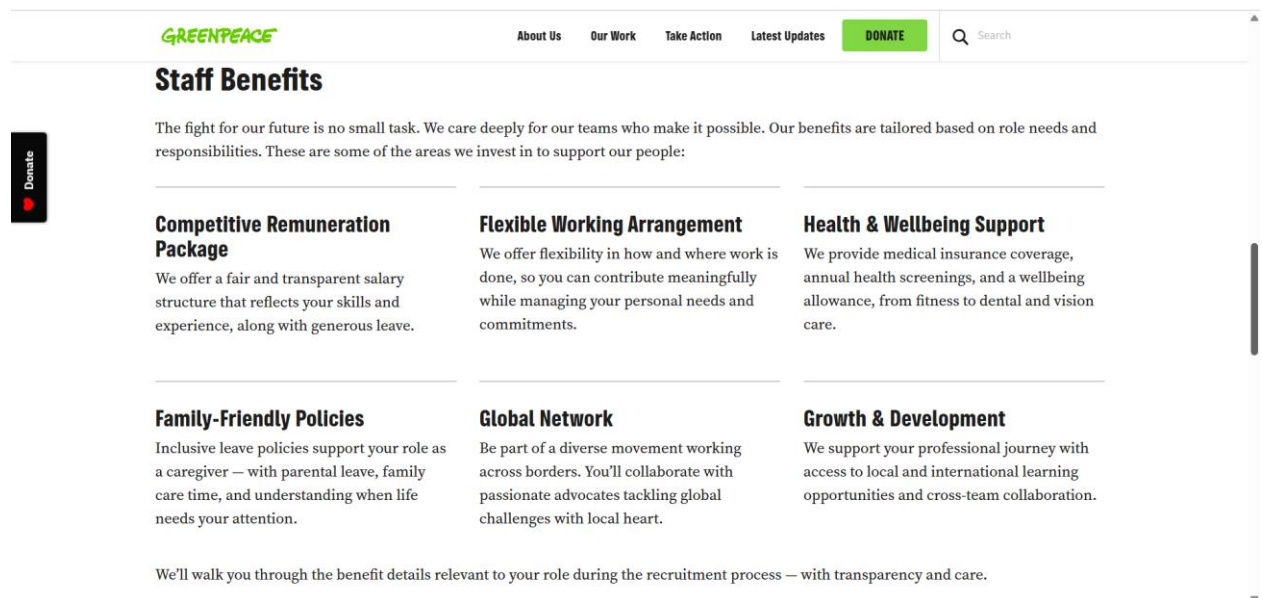

Figure 33 : Careers Part 3

Analysis of Careers

The figures 31 -33 demonstrate the career development in the organization. With the help of the paragraphs, the user can know how the charity develops careers, which job positions are available at the moment, and what benefits the employees will receive. This presents everything on a platter and therefore, is more attractive to the masses.

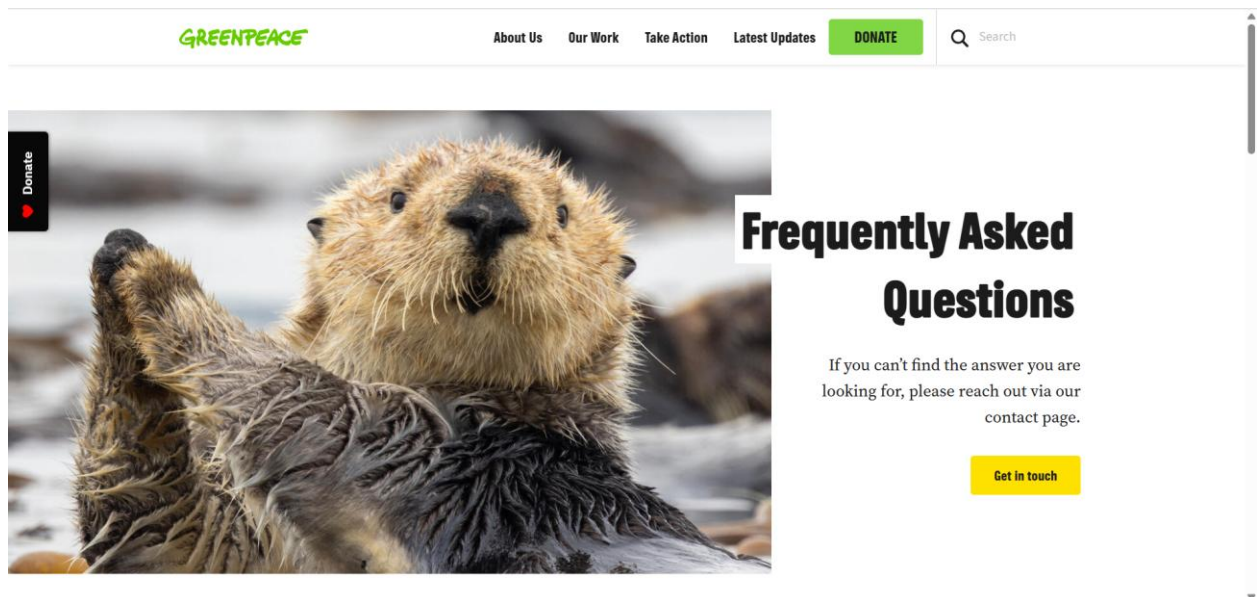

Figure 34 : Frequently Asked Questions(FAQ) part 1

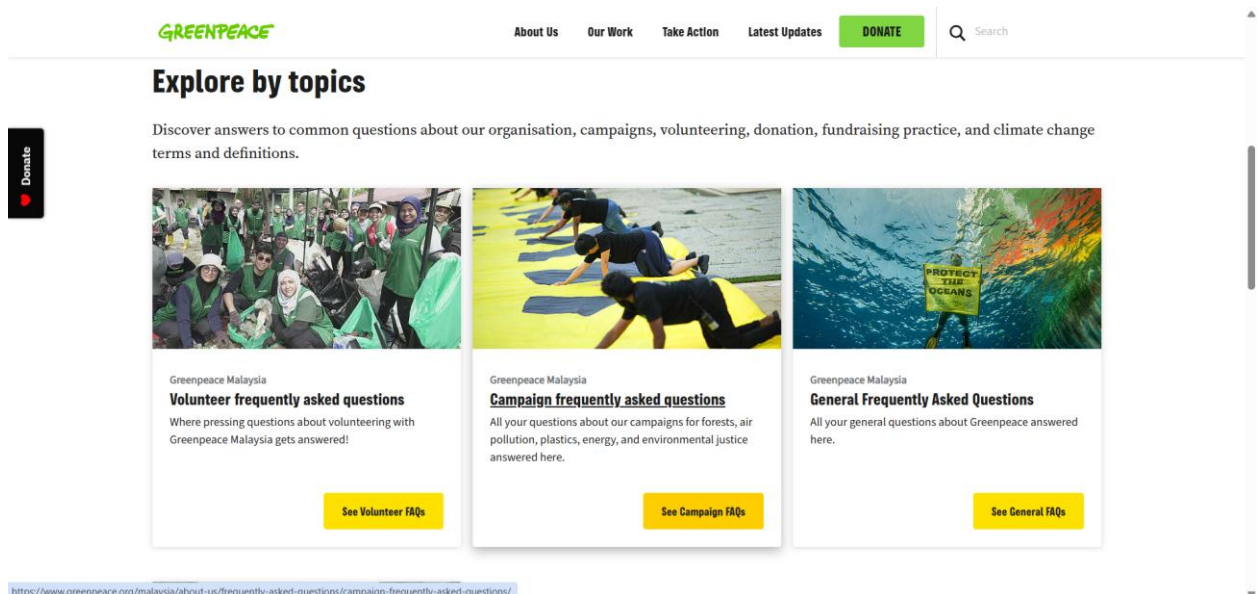

Figure 35 : Frequently Asked Questions(FAQ) part 2

Analysis of Frequently Asked Questions (FAQ)

Some typical questions that people raise concerning the organization can be found in Figures 34 and 35. Some of the popular and topical issues are emblazoned on the page.

Furthermore, the users have an opportunity to press a button to navigate to the Contact Us tab and address their questions to the organization.

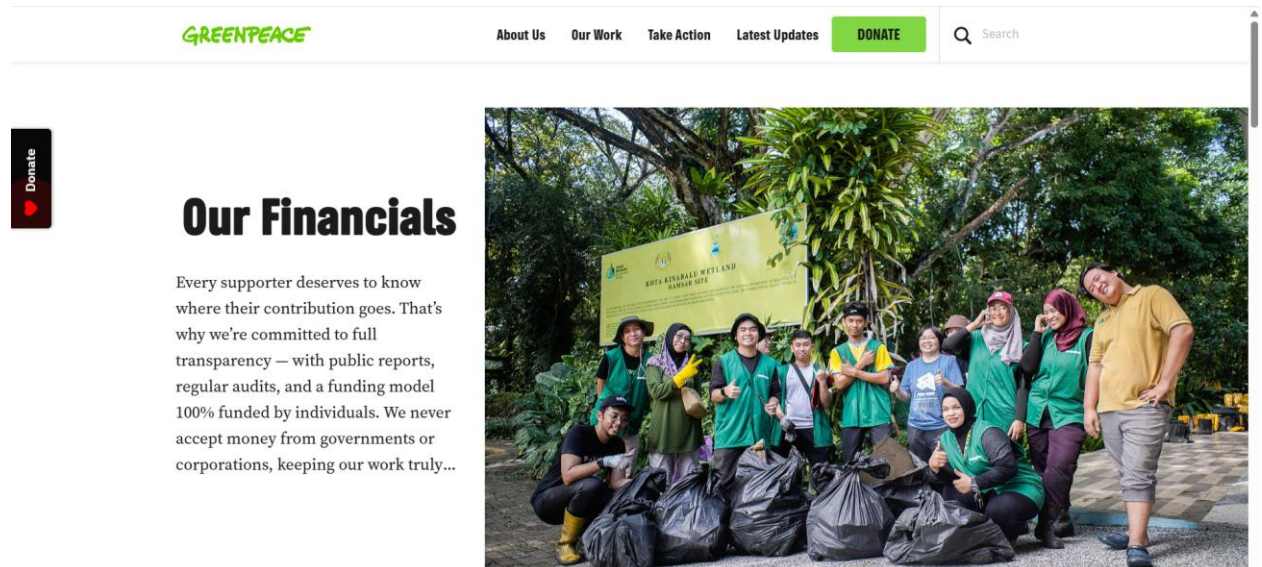

Figure 36 : Our Financials part 1

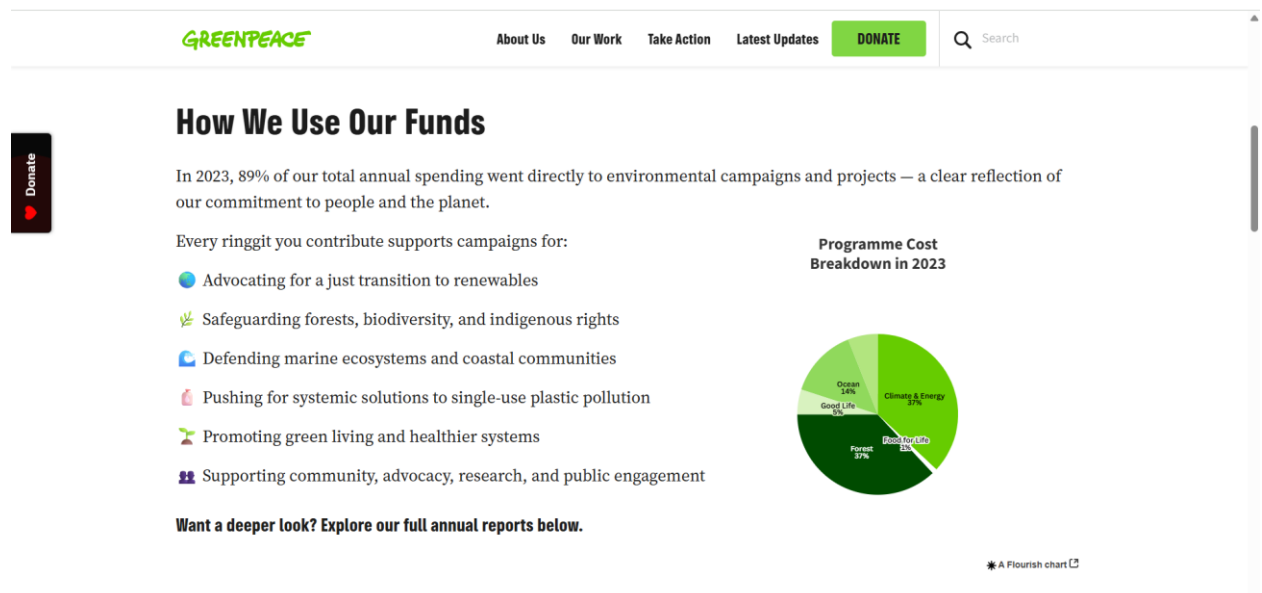

Figure 37 : Our Financials part 2

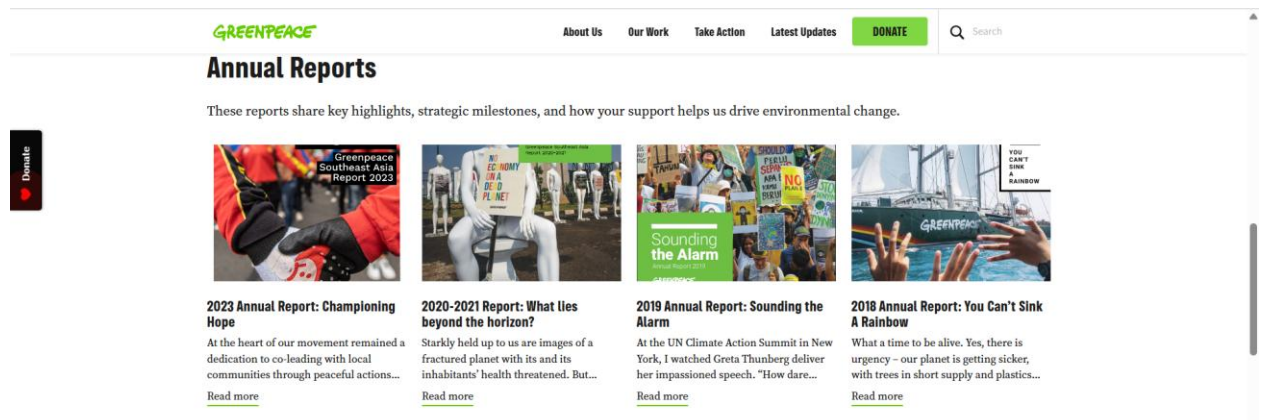

Figure 38 : Our Financials part 3

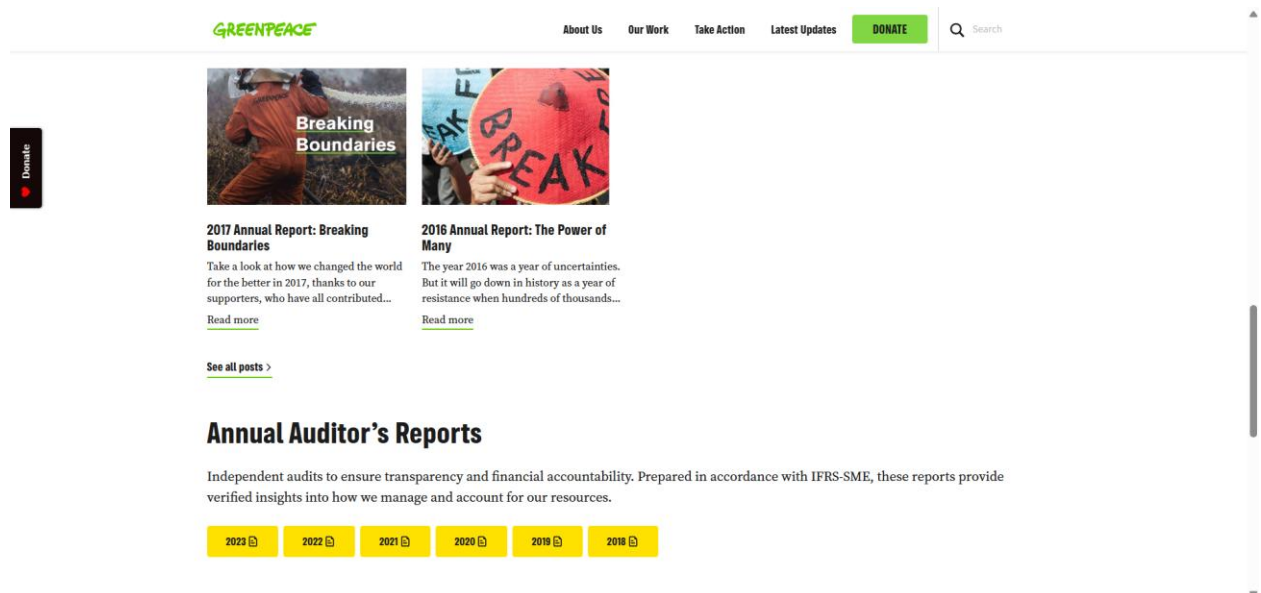

Figure 39 : Our Financials part 4

Analysis of Our Financials

The financial position of the organization is represented in Figures 36 and 39. The organization argues that all supporters have the right to information on the location of their donations. By publicly reporting, opening regular audits, as well as the use of a fully individually funded funding model, the organization has its financial flows revealed transparently, and such extreme transparency can contribute to users feeling more confident during the process of making donations.

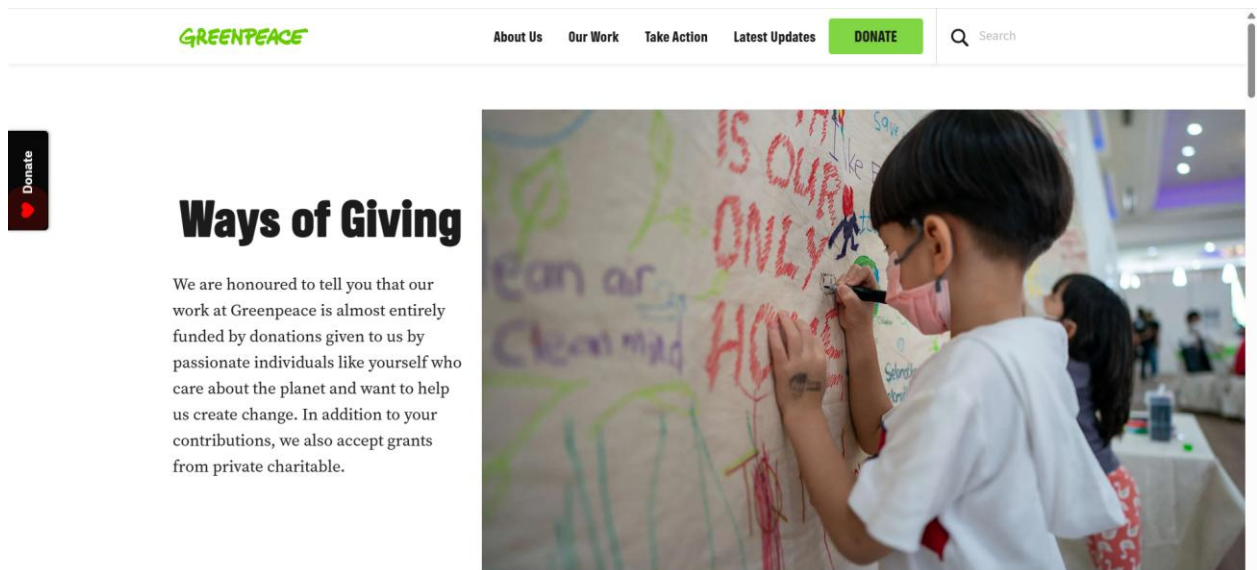

Figure 40 : Become a donor part 1

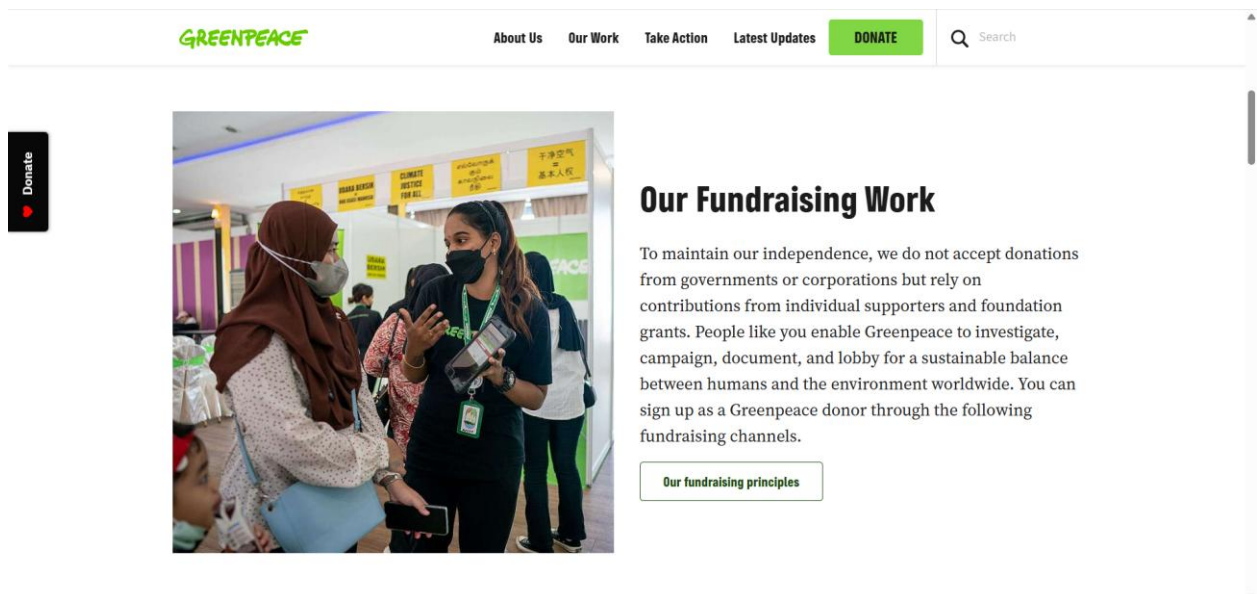

Figure 41 : Become a donor part 2

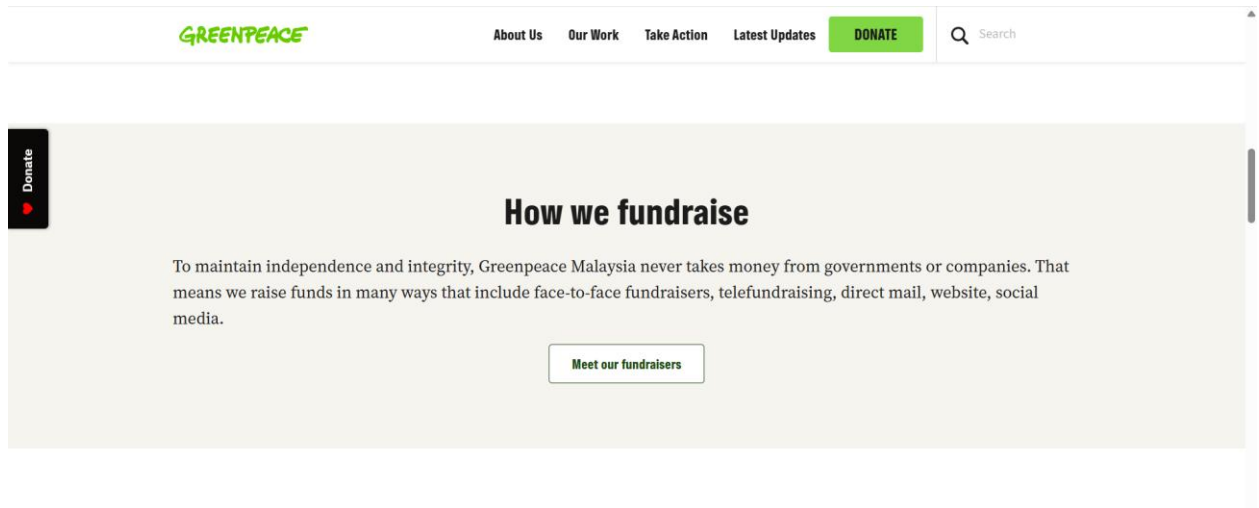

Figure 42 : Become a donor part 3

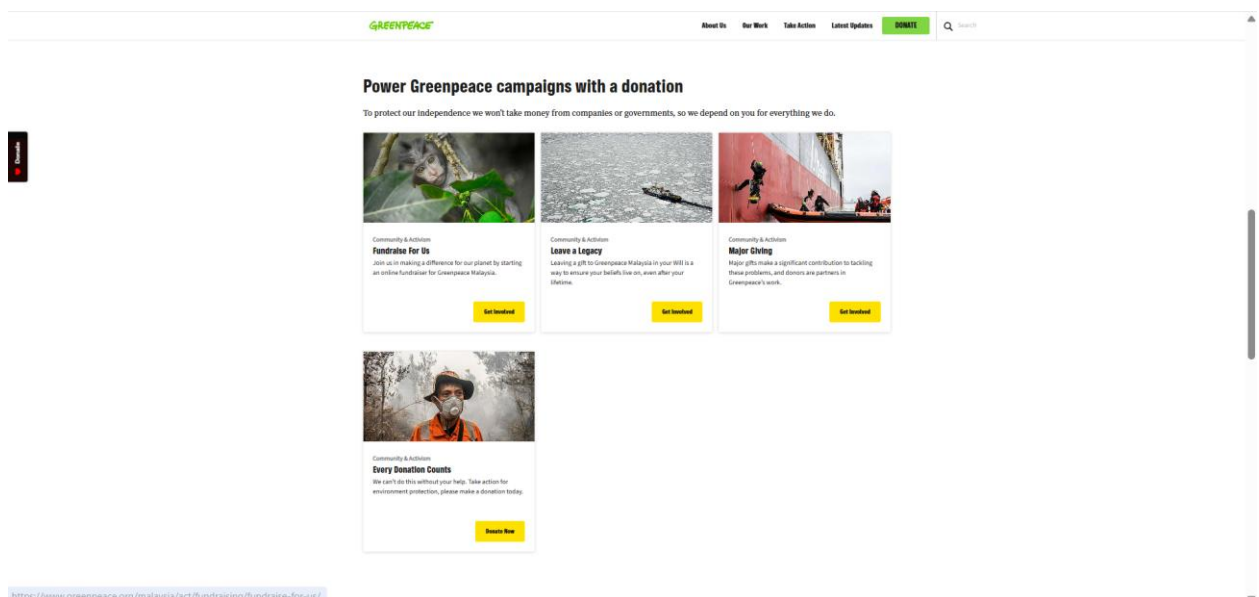

Figure 43 : Become a donor part 4

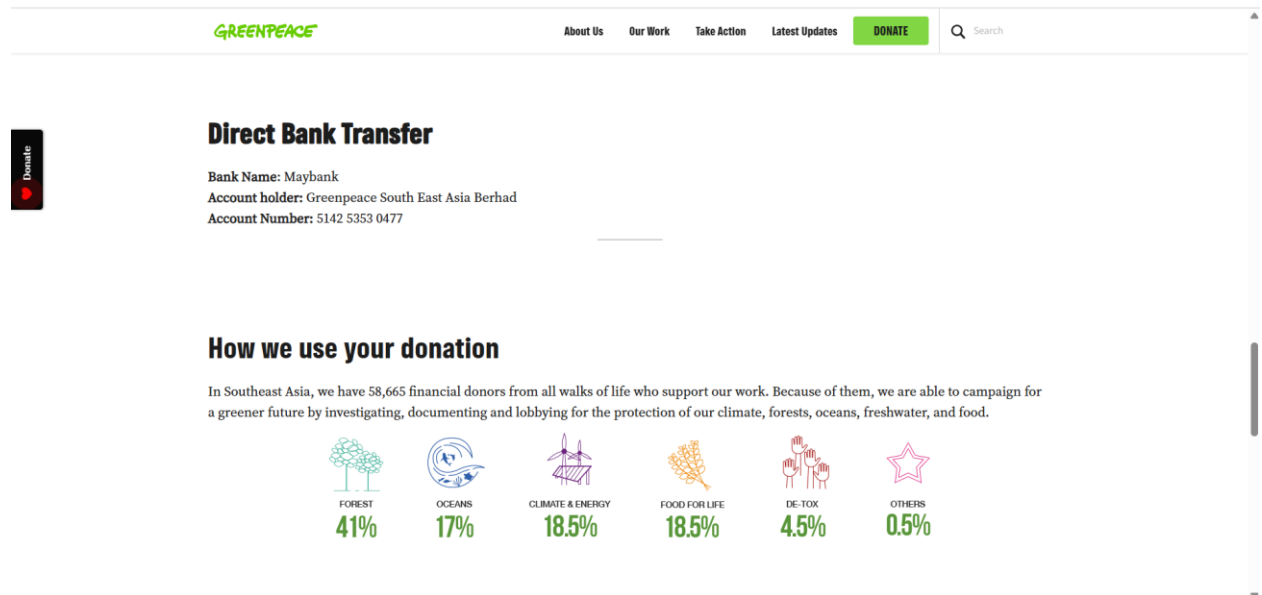

Figure 44 : Become a donor part 5

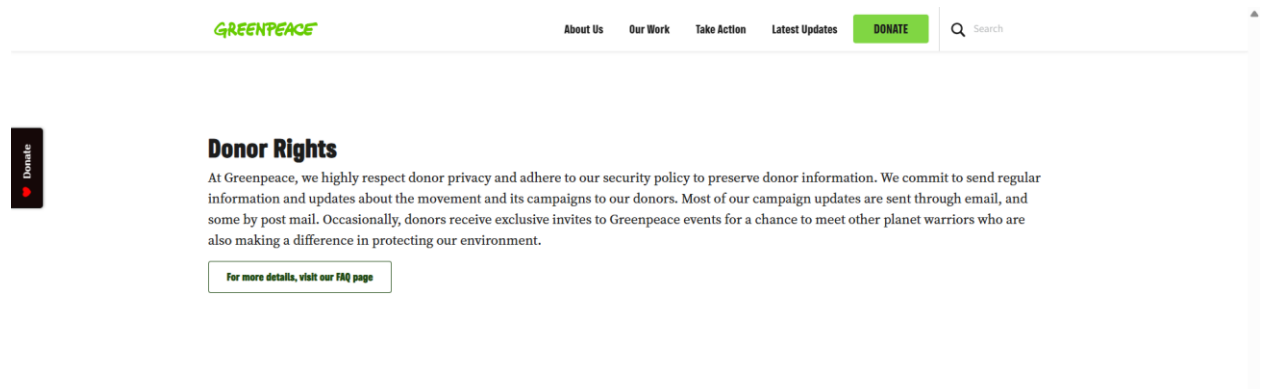

Figure 45 : Become a donor part 6

Analysis of Become a donor

Figures 40 and 45 explain the steps on how to become a donor. This page contains the description of the work of this organization, including means of fundraising and organizing events. It also describes how the usage of user donations and donor rights contributes to the creation of confidence in the organization and inspires donors to donate.

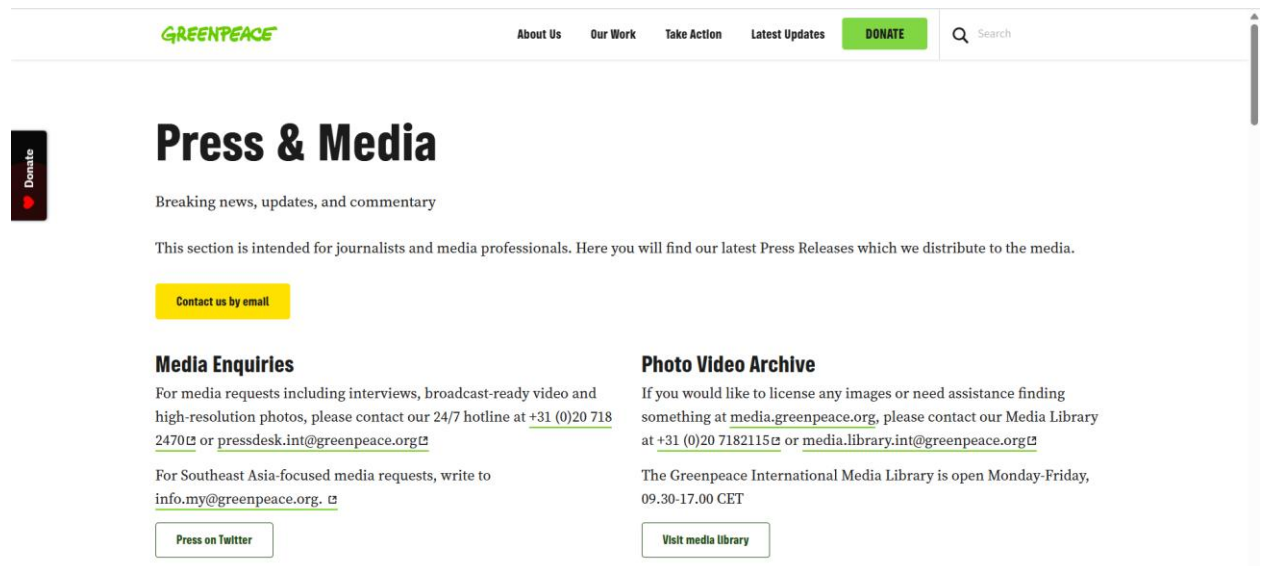

Figure 46 : Press and Media part 1

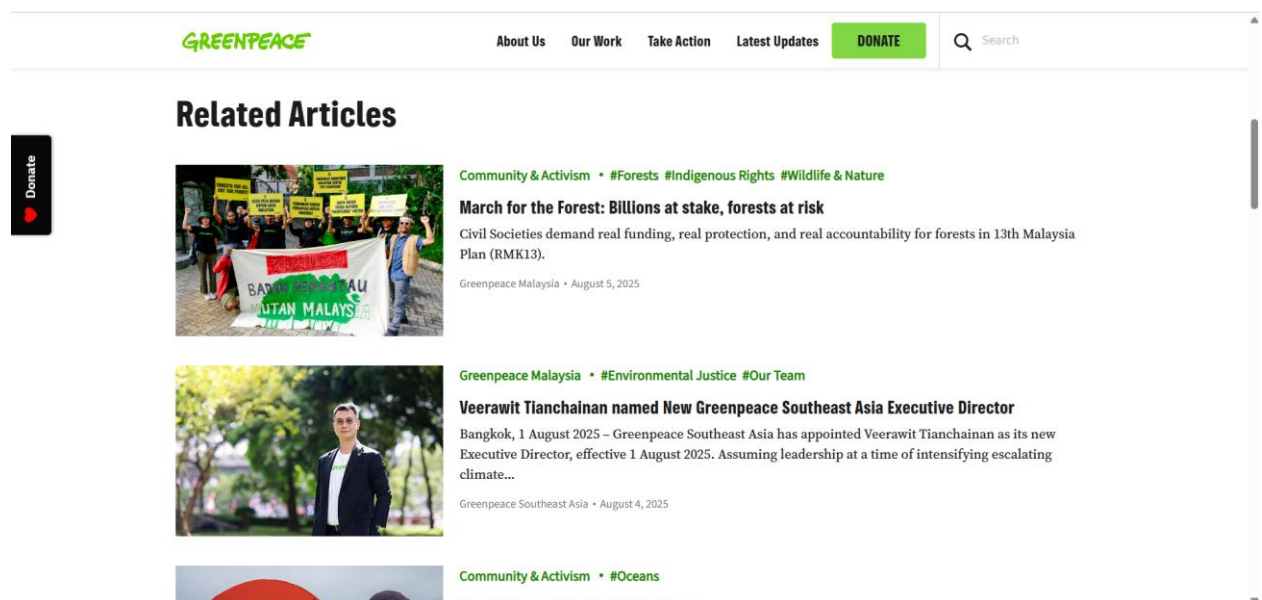

Figure 47 : Press and Media part 2

Analysis of Press and Media

News media contents are presented in figures 46 and 47, either in the form of a media advisory, photo and video archive, or pertinent articles. Clicking on links or photos, users are able to get acquainted with related news information.

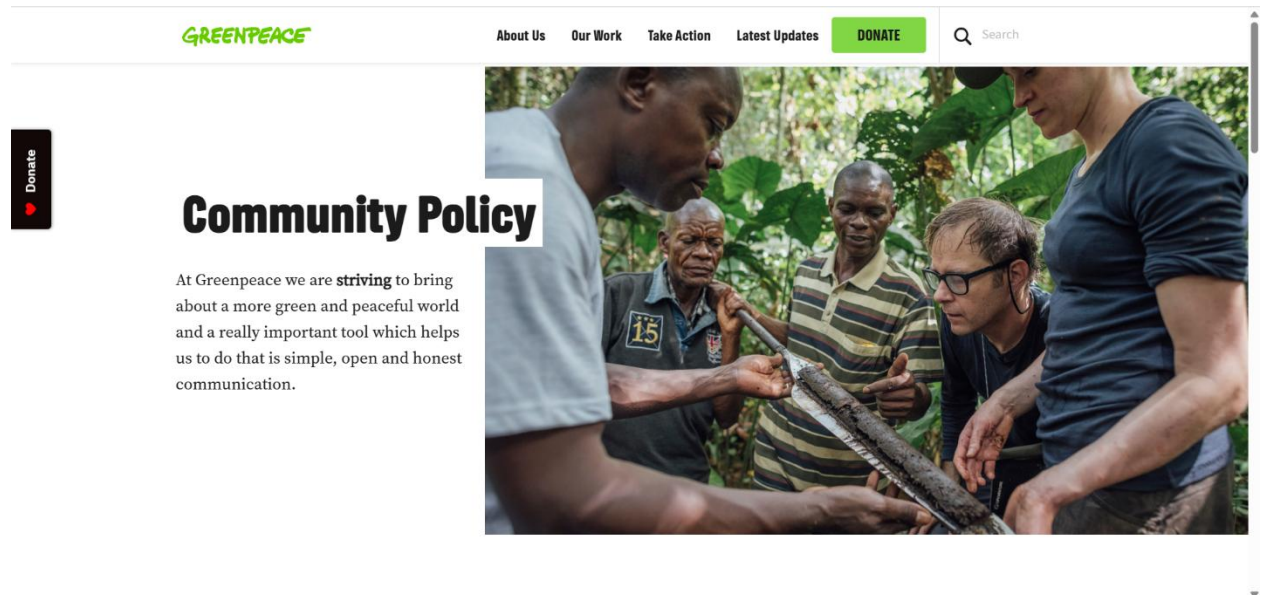

Figure 48 : Community policy part 1

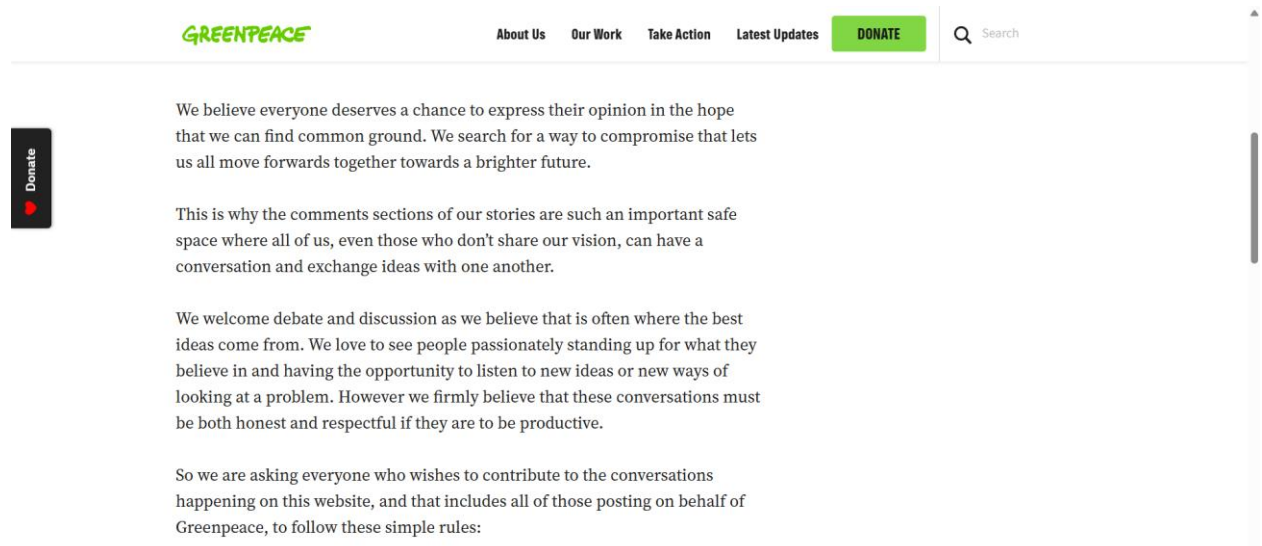

Figure 49 : Community policy part 2

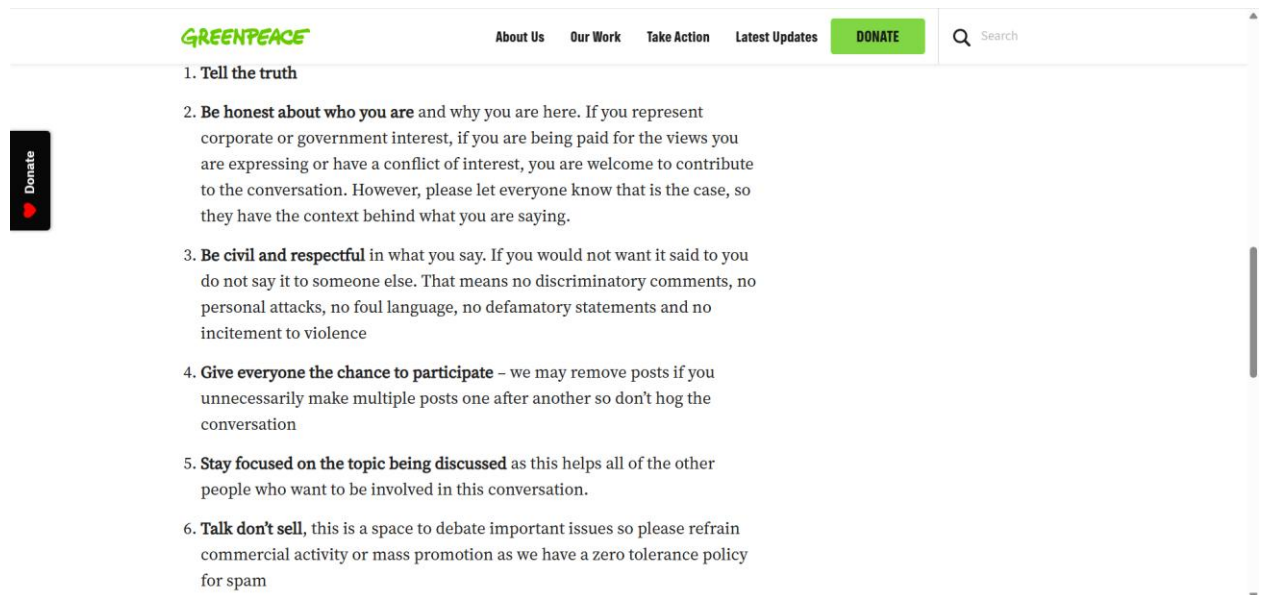

Figure 50 : Community policy part 3

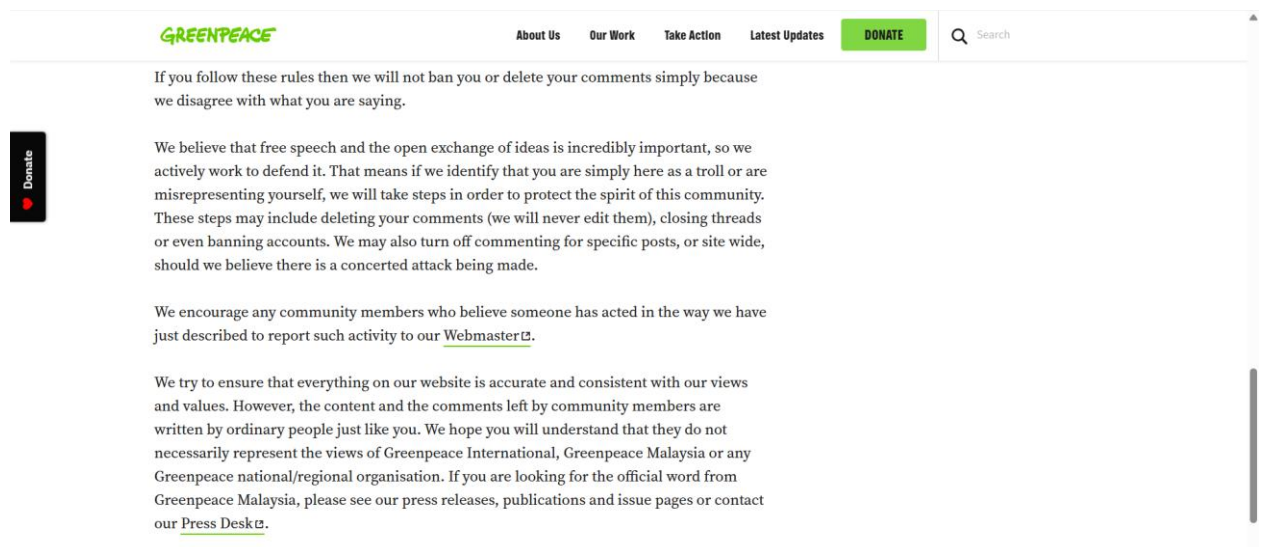

Figure 51 : Community policy part 4

Analysis of Community policy

The community policy can be observed in figures 48 and 51. The organization aims at making the world a greener and more peaceful place and indeed the most significant tool in assisting us in this issue is straightforward, plain, unvarnished communication. Consequently, various policies and regulations have been set and placed at this page to be read by users. The set of rules that have to be observed is mentioned clearly.

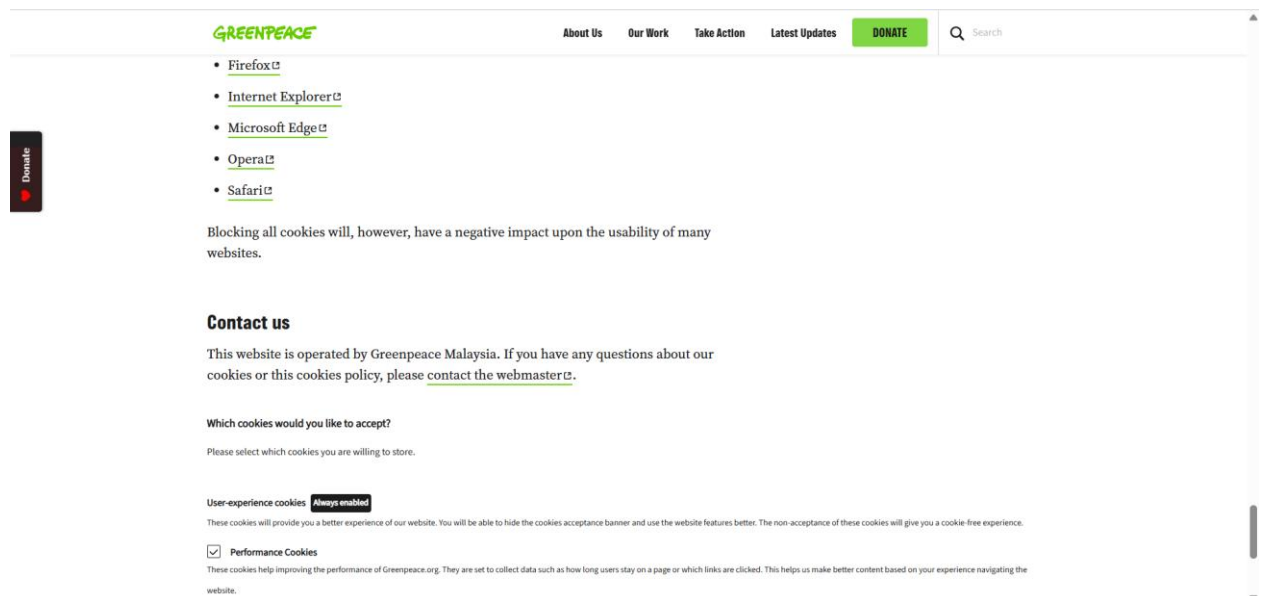

Figure 63 : Privacy and Cookies part 12

Analysis of Privacy and Cookies

Privacy and cookies are depicted in Figures 52 and 63. Greenpeace is convinced that online privacy is the basic right of the user, and the organization tries to secure the online safety of all. This page will introduce all the questions of privacy and security,

such as user privacy, the security measures, the processing of information, and the rights of a user. Cookies are described in detail, and the organization can not, unfortunately, offer a cookie-free experience on our website. Lastly, there is a link button to facilitate contact with the organization, called Contact Us.

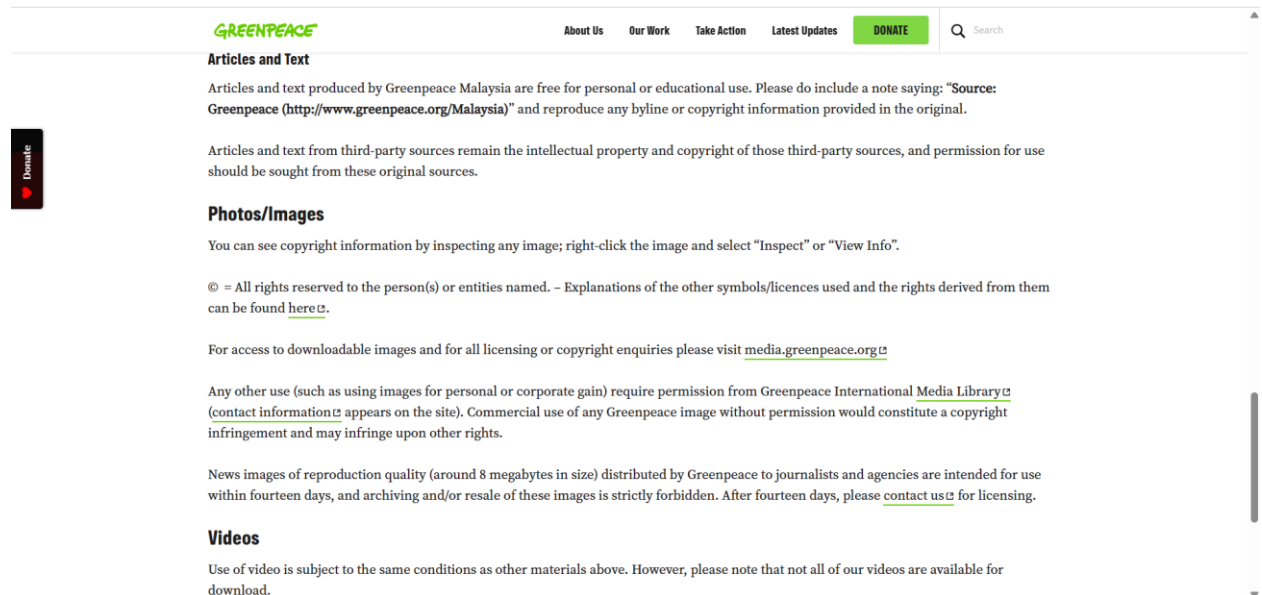

Figure 68 : Terms and Copyright part 5

Analysis of Terms and Copyright

The terms and copyrights can be seen in Figures 64 and 68. This page tells about the terms and copyrights and clearly provides the terms and copyrights of the organization.

Advantages	Disadvantages
• Greenpeace.org/Malaysia/ provides convenient shortcut links, allowing users to quickly navigate to specific sections of the website.	• The website does not require users to register for an account, which means users cannot access or track past donations.
• All sections are accompanied by relevant images, helping users better understand the content and the causes they support.	• A minimum donation amount is set to prevent users from donating below a specified threshold
• The donation process offers two payment methods, allowing users to select their preferred donation amount.	• The payment process involves multiple steps, which may be time-consuming and inconvenient for some users.
• A CAPTCHA is used during the payment process to verify that the transaction is being processed by a genuine user, enhancing payment security.	• The website does not display a progress tracker or a detailed breakdown of how donated funds are used, which may reduce transparency and user confidence.
• The website has social media links that make it simple for people to follow Greenpeace Malaysia's updates or share campaigns.	• The lack of a progress tracker or a thorough explanation of how donated funds are handled on the website may undermine user confidence and transparency.
• Real-world environmental success stories are shared in the "Stories" area, inspiring users and fostering a closer emotional bond.	• There is little feedback available on the donation confirmation page, and there is no way to get a thorough electronic receipt or an instant thank-you note.

Website 2

URL : <https://careformalaysia.org.my/%E6%8D%90%E6%AC%BE/>

This website is a multifunction website that is convenient for donors to donate money through the online website system. This website has many payment methods for donors to choose from, such as credit cards, debit cards, and online banking platforms like Touch and Go. Besides, this website supports one-time donations or monthly recurring donations. Once completed, the system will automatically generate an email for the donors.

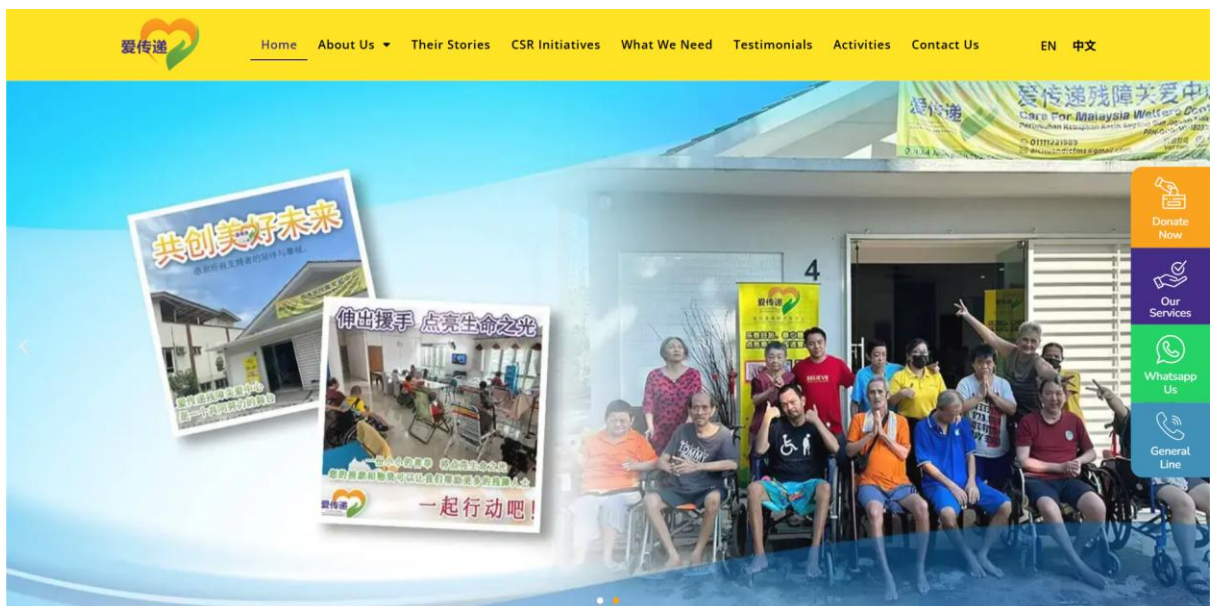

Figure 69 : Home page (header)

The figure above shows many of the functions, such as about us, their stories, CSR initiatives, what we need, testimonials, activities, and contact us for the user to view. Apart from that, this page provides an English and Chinese language switching function. Moreover, this website has the ‘Donate Now’ button for donors to donate money without seeing another page. Furthermore, we can communicate with the charity to ask more information via WhatsApp by using the WhatsApp us and general line buttons.

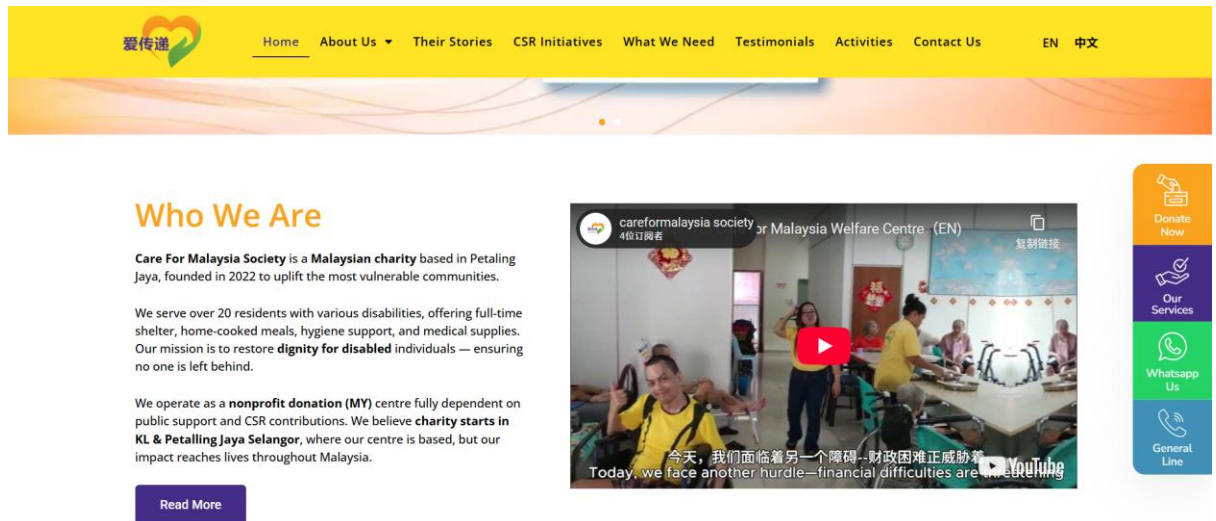

Figure 70 : Home page (who we are)

You may go to the about us page by pressing the read more button. And also, you may view the YouTube video to learn more information about them.

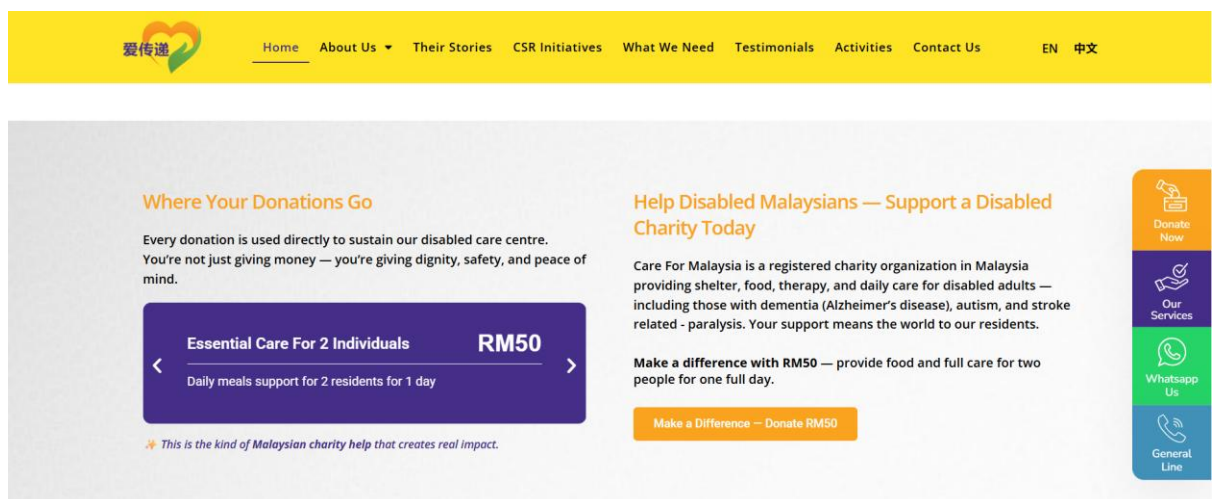

Figure 71 : Home page (where your donations go)

You may donate RM50 directly by pressing the “Make a Difference – Donate RM50” button or by entering the amount of donation.

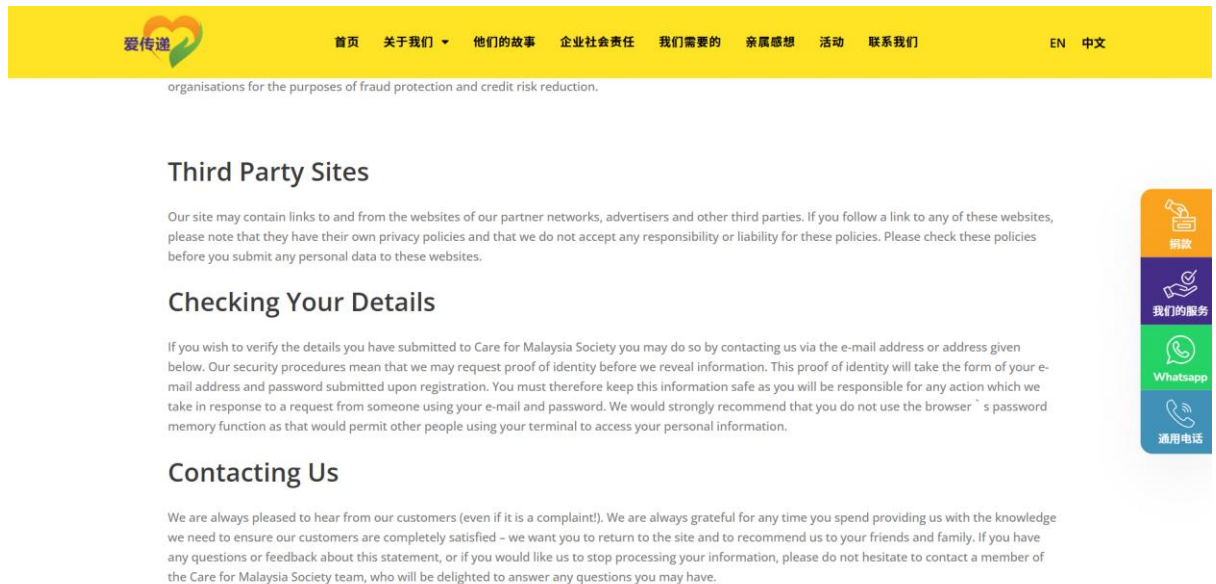

Figure 123 : Privacy Policy page (part 3)

Advantage	Disadvantage
Care for Malaysia Society is highly efficient in localized payment processing, and deep integration with Malaysia's FPX banking system enables instant transfer. Besides, it also accepts credit/debit card payments from the Malaysia Bank.	This website only accepts Malaysian dollar transactions and completely blocks foreign bank cards (all Visa or Mastercard that are not issued in Malaysia are rejected).
The payment receipt, including the complete tax deduction information, is automatically sent after the donation is successful. The monthly donation system deduction is stable and reliable.	Donor management functionality is missing because the donor is unable to retrieve the history of the payment; they can only check their email that was sent from the charity.
User experience focuses on smoothness because they had pre-set the amount button like RM50, RM100, RM200, or RM500 that enables donors to select, and the donors just need to type in their name, email, and phone number (message is not compulsory).	Page loading pattern failed when we first logged in to the website; we must refresh once to see the home page picture.
The website features visual information that depicts actual charitable endeavours, such as images and event highlights.	The website's lack of social media integration, including links to YouTube, Facebook, and Instagram, restricts its reach.
Users may easily navigate between pages like Home, About, Volunteer, and Donate thanks to the website's straightforward and well-organised navigation bar at the top.	User trust may be impacted by the lack of a visible progress bar or transparency report that details how funds are used.

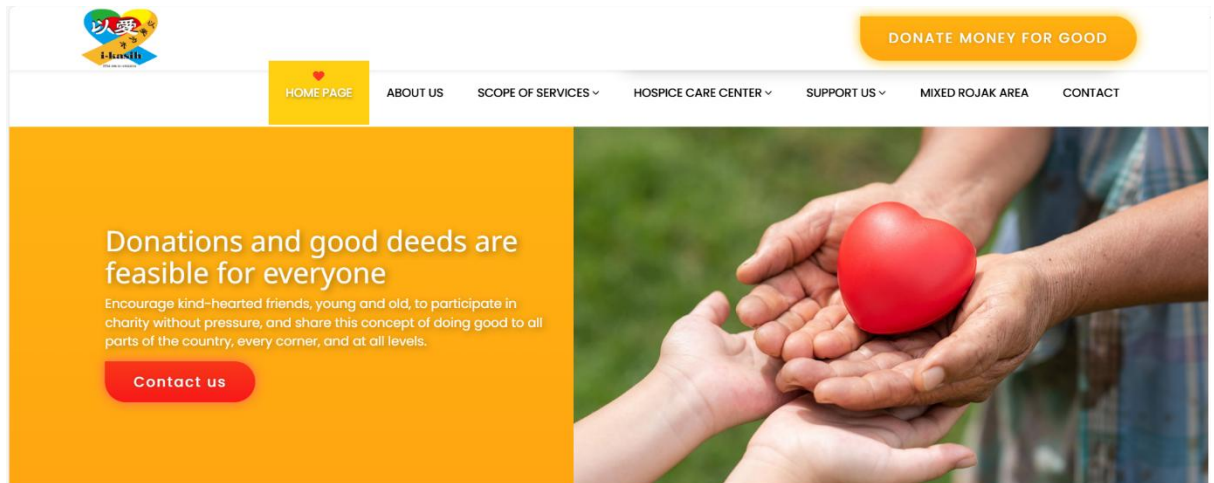

Figure 131 : Homepage (Part 6)

This webpage is to encourage the friends to share the concept of doing good to the world. A contact us button is at the below of the description for user to contact the organisation.

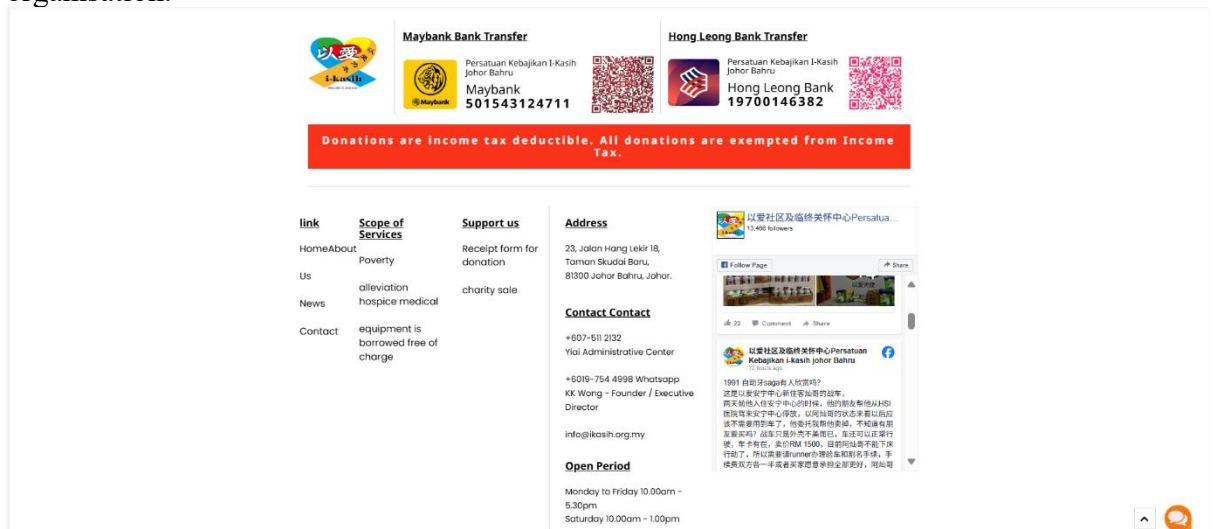

Figure 132 : Homepage (Part 7)

This page is as the hospice care organization's donation and contact details page providing Maybank and Hong Leong Bank bank transfer information. It assures funders of financial transparency by emphasising that contributions are tax deductible. Along with providing the organisation's address, phone number, email, and operating hours, it also provides connections to key aspects including services, donation receipts,

and charity sales. At the lower right corner has a chatting button for user to chat with the organisation through Facebook, WhatsApp, email and phone.

About Us

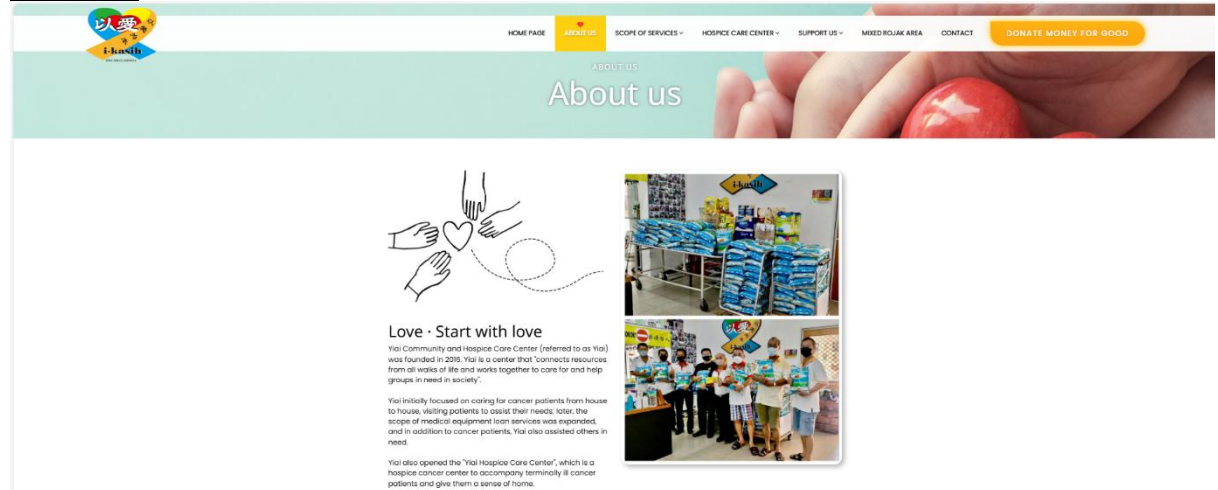

Figure 133 : About Us (Part 1)

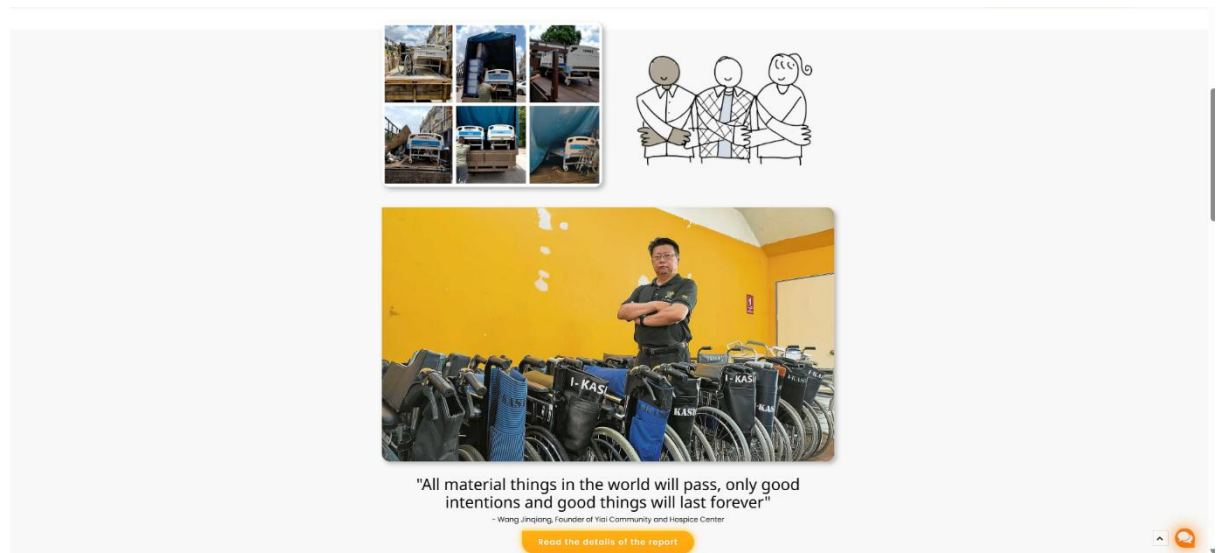

Figure 134 : About Us (Part 1)

This page is the About Us section of the i-Kasih Care Organisation. It highlights that the organisation's work started out of love and is still motivated by compassion as it outlines its history and mission. This organisation is helping cancer patients by providing house visits and loans for medical equipment, but as time went on, its offerings grew to encompass more comprehensive medical support, poverty alleviation, and aid for needy families. The organisation's objective of love, caring, and community involvement is reinforced by the photos on the page.

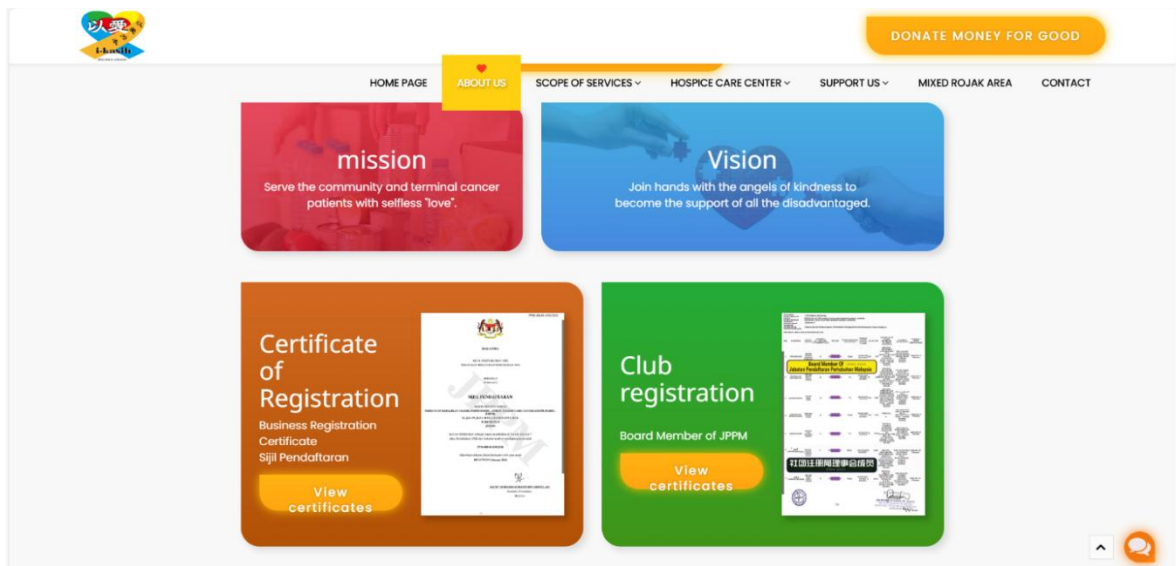

Figure 135 : About Us (Part 2)

This page is the About Us section of their mission, vision and certificate for i-Kasih Care Organisation. It highlights that the organisation mission and vision. At the below are the certificate of registration and club registration of this organisation. It assures funders of trust transparency by emphasising that is business registration certificate. At the lower right corner has a chatting button for user to chat with the organisation through Facebook , WhatsApp, email and phone.

Figure 136 : About Us (Part 3)

This page is the About Us section about their background and history with this video

Scope of Services

Poverty alleviation

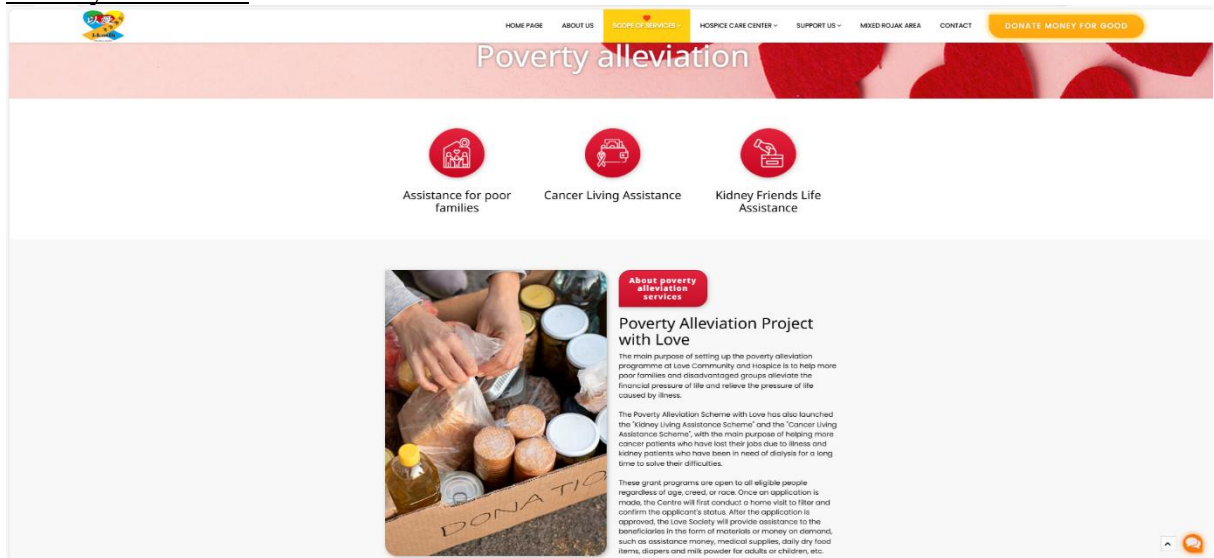

Figure 137 : Scope of Services (Part 1)

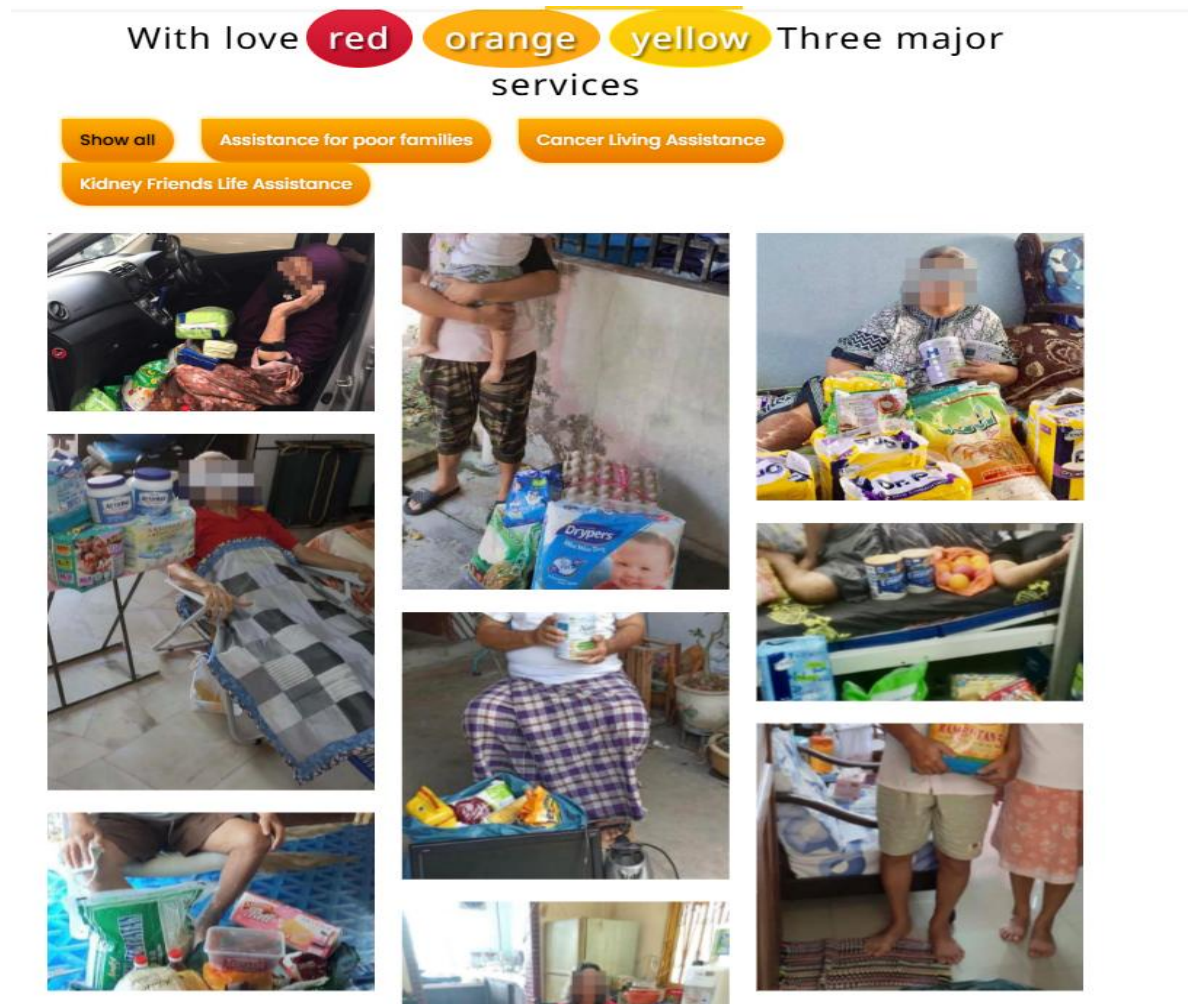

Figure 138 : Scope of Services (Part 1)

This page's purpose is to introduce and promote poverty alleviation aid programs, with the goal of giving impoverished families, cancer patients, and renal disease patients both cash and life support. The page is broken up into two primary pieces. The section explains the goals and services offered by the poverty alleviation initiatives, with a focus on how financial aid can help disadvantaged populations improve their quality of life and lessen the stress that comes with disease. Users can readily obtain the information they require and apply for pertinent assistance thanks to the overall page design, which strikes a balance between thorough content delivery and clear visual direction.

Hospice Care

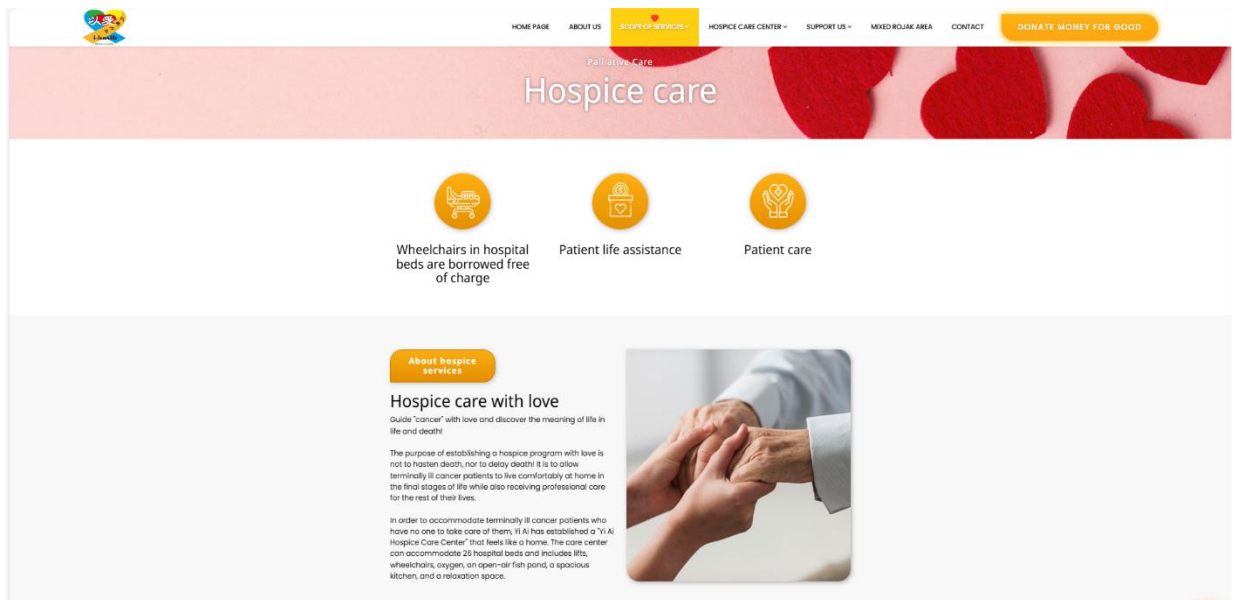

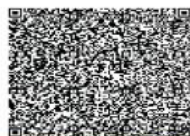

Figure 139 : Scope of services (part 2)

Love Hospice Care Center

Yiai also opened the "Yiai Hospice Care Center", which is a hospice cancer center that accompanies terminally ill cancer patients and gives them a sense of home. The hospice centre is expected to commence service in the second half of 2022.

Please follow us

以爱安寧護理中心 LOCATION QR Code

2, Jalan Jaya Mas 1/3, Taman Jaya Mas, 81300 Skudai, Johor
 in order not to disturb the recuperation of cancer patients,
 the hospice care center does not accept "non-patient"
 family members' visits

Figure 140 : Scope of services (part 2)

This page serves as a thorough introduction to the Love Hospice treatment Centre's philosophy and services, which include offering terminal cancer patients and their families both professional medical treatment and emotional support. The page is logically divided into three sections: yearly reports, facility details, and service offerings.

Medical Equipment

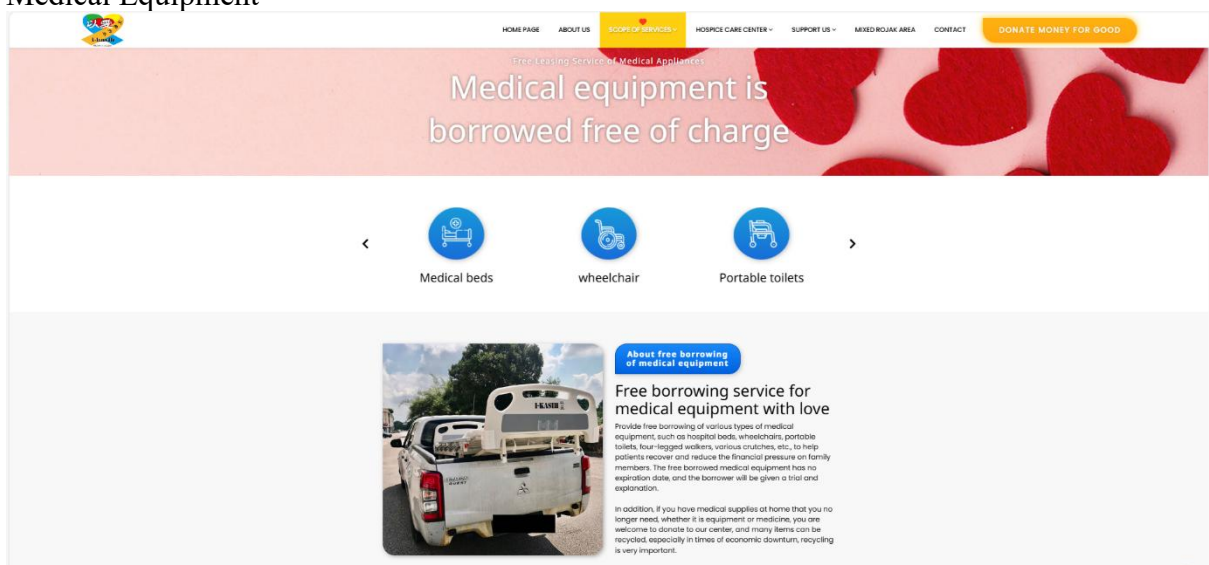

Figure 141 : Scope of services (part 3)

Medical equipment area

All medical supplies are free to borrow without a time limit, if they are damaged during use, as long as they are not deliberately modified, our center welcomes you to come and replace them, and it is also a lifelong replacement!

Figure 142 : Scope of services (part 3)

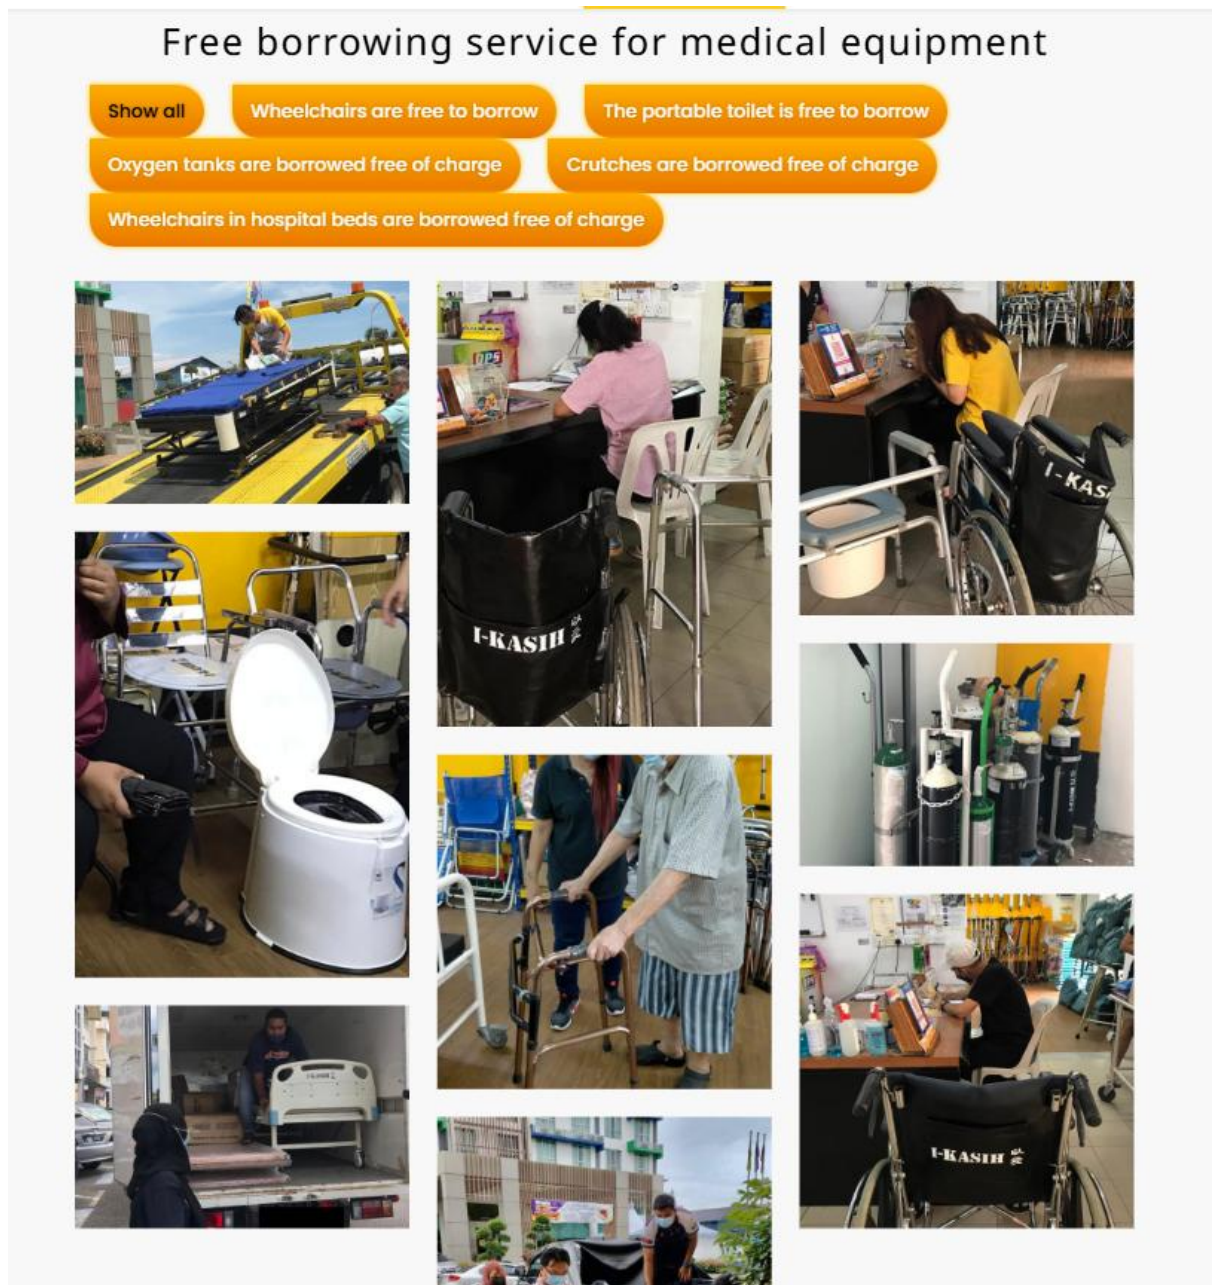

Figure 143 : Scope of services (part 3)

This page serves as a thorough introduction to medical equipment can be borrowed as free, which include offering terminal cancer patients and their families both professional medical equipment. The equipment that shows in the picture if the damage wasn't deliberate, users are free to swap out damaged equipment whenever they choose. This service model exemplifies the organisation's dedication to long-term patient assistance and humanitarian care.

Hospice Care Centre

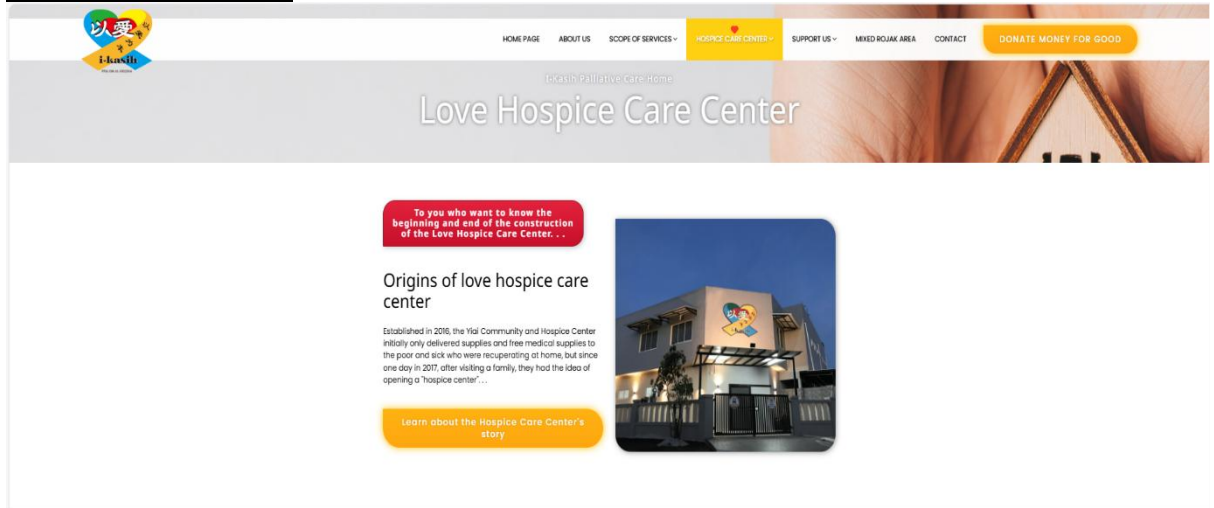

Figure 144 : Hospice Care Centre

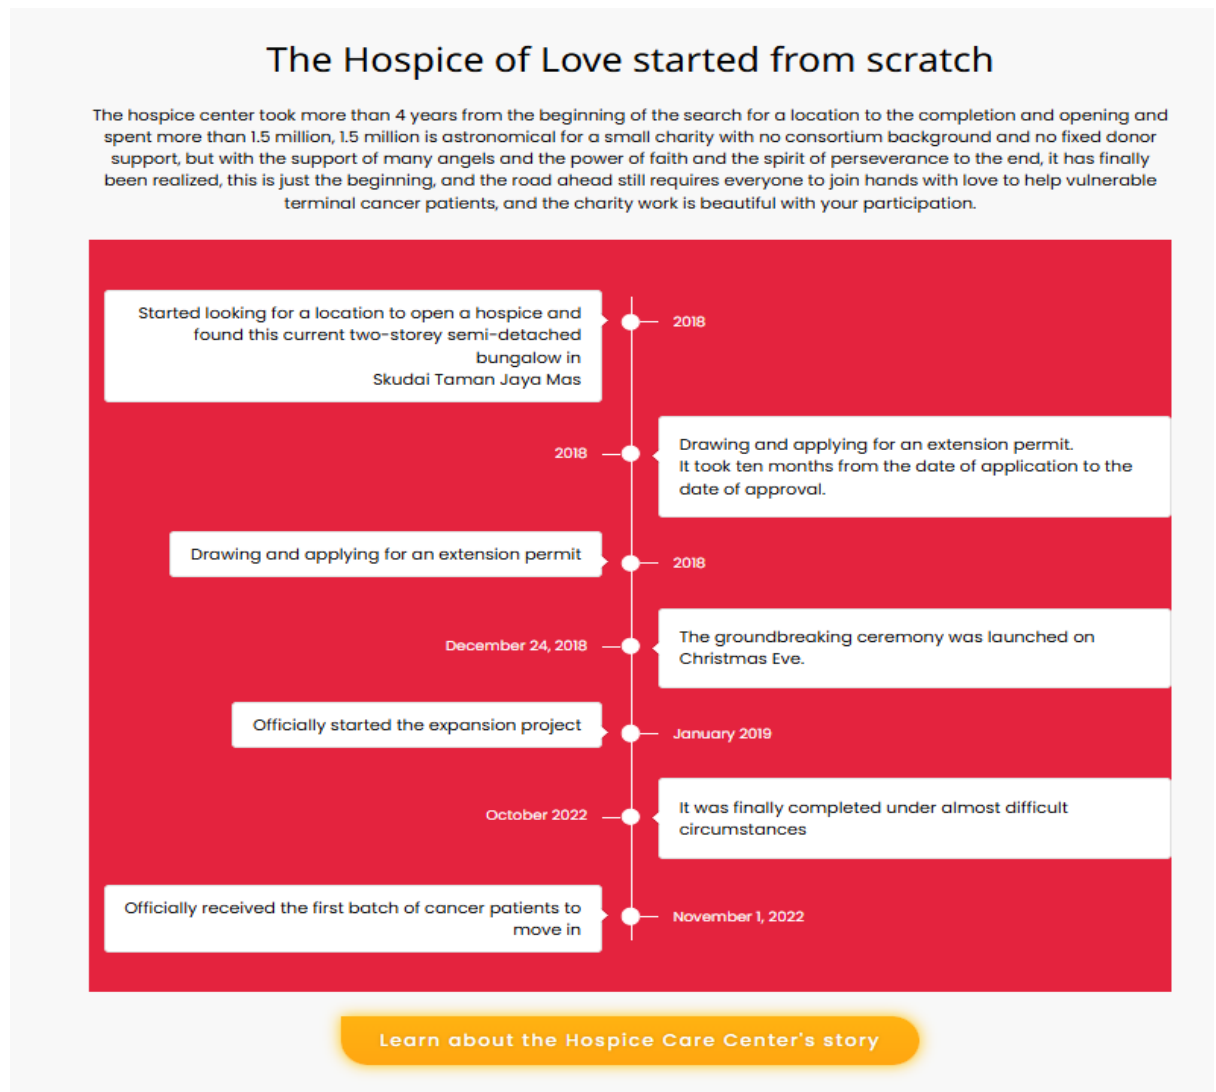

Figure 145 : Hospice Care Centre (Part 1)

Through narrative text and timeline images, this page offers a thorough overview of the Love Hospice Care Centre's founding story and development journey, illustrating the institution's evolution from beginning. The history of the organisation is detailed in the first section. A thorough timeline of the centre's founding process is provided in the second section, which also highlights the incredible accomplishment of finishing construction with donations totalling 1.5 million dollars despite the lack of corporate support or reliable financial sources. The page skilfully blends institutional history with public involvement advocacy by finishing with a strong call to action (Charity work is beautiful with your participation). The design blends inspirational stories with realistic timelines, including precise dates, monetary values, and building stages to evoke strong feelings while showcasing openness about the difficulties surmounted.

Specially designed for hospice care

The Love Hospice Care Center is a center dedicated to receiving terminal cancer patients, so some of the facilities or equipment in it are specially designed for them. . .

The second floor is a gathering area for relatives and friends

To avoid interfering with other patients, the ward can only limit two people to visit the same patient at a time, but there is no limit on the number of people in the family and friends gathering area on the second floor, so when multiple relatives and friends arrive, cancer patients who can use wheelchairs can enter the elevator to the second floor accompanied by the staff to gather with other relatives and friends.

Spacious outdoor washroom

Outdoor spacious and airy resort toilets and baths should try to avoid odors in the indoor air.

Mobile washing cart

The mobile washing table can be pushed to the bedside to help the patient wash the body with clean water.

Figure 146 : Hospice Care Centre (Part 2)

This page has been showing the specially designed for hospice care. The reason for having this facility is to improve the quality of life for patients while upholding medical standards.

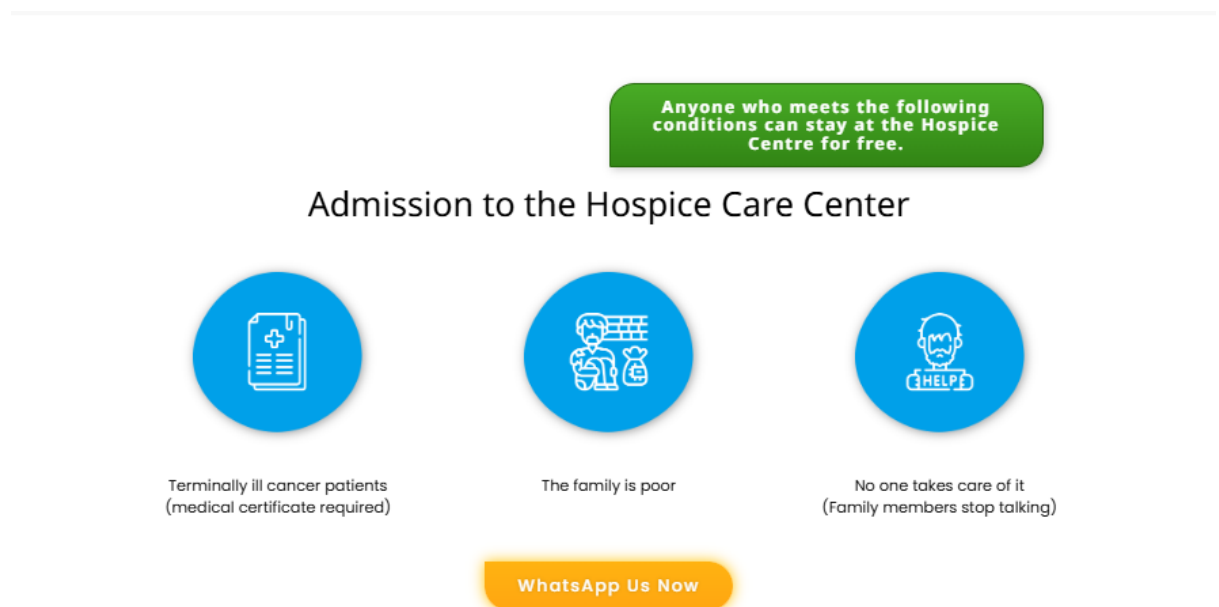

Figure 147 : Hospice Care Centre (Part 3)

This page has been showing the admission to the hospice care centre. There are three admissions which is terminally ill cancer patients, poor family and no one takes care.

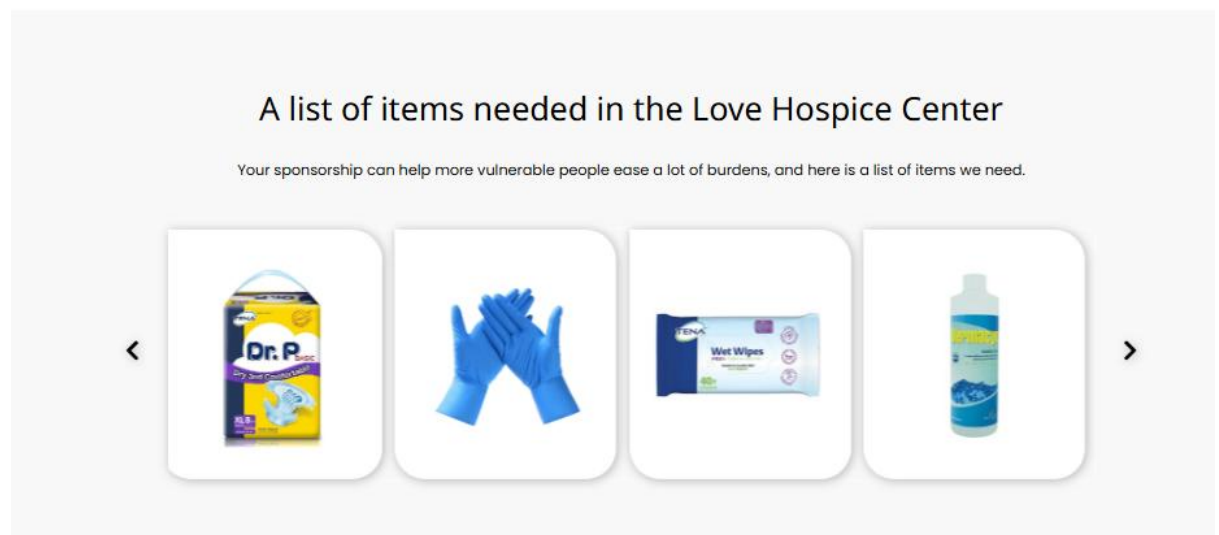

Figure 148 : Hospice Care Centre (Part 4)

This webpage is showing a list of material. With this list, donator will know what material that needed for them to support their daily life and nutrition.

News

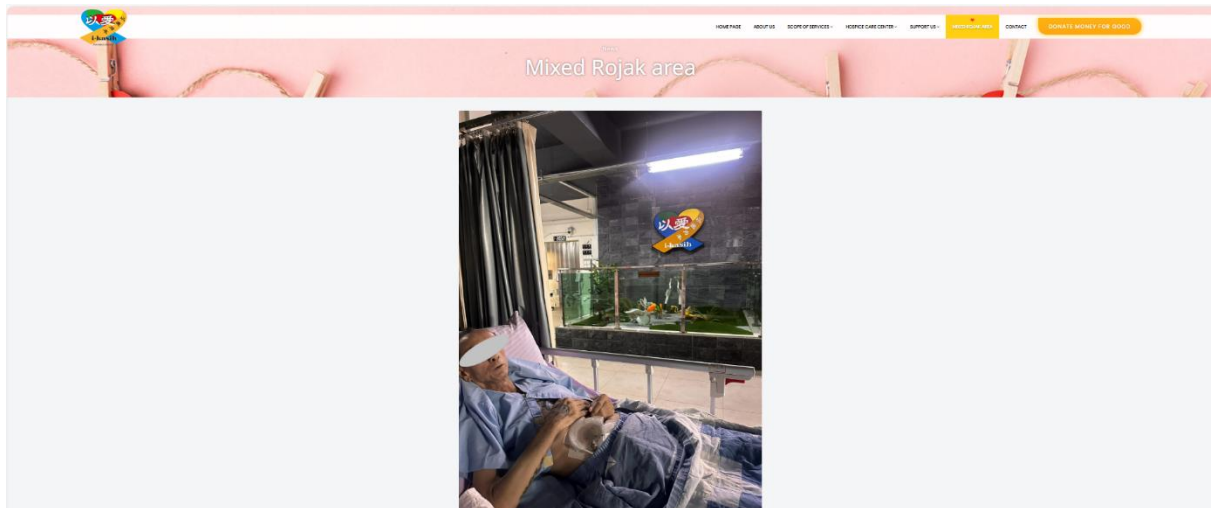

Figure 149 : News (Part 1)

Mixed Rojak Area 🕒 August 10, 2025

You are kind, and your kindness will be rewarded

Brother Ah Can held my hand several times and said, "You are very kind, good intentions will be rewarded".....

Today, the Yiai Administrative Center is only open until one o'clock at noon, after closing the door, I went to the Hospice Center to meet him, Brother Acan's check-in procedure is more special, he was directly contacted by the Johor Bahru Welfare Department and asked me to take him in, because Yiai got the license of the Ministry of Welfare, so many times the officials of the relevant departments opened their mouths, and the official's affection always had to be taken into account, after all, the license will be renewed in the future, and everyone who understands the reason understands, fortunately, Ah Can's situation and condition meet the conditions for admission.

Brother Ah Can is a single widow and does not have any relatives, which is why the Ministry of Welfare intervened, he had colorectal cancer, and he had surgery and put a fecal bag in his abdomen, although the doctor did not tell him what stage it was, but I saw from the swelling of his feet, the cancer cells should have spread, which is considered to be the stage of the third stage entering the fourth stage, so he belongs to the terminal cancer friend.

When I met him, I saw that he had dolls tattooed on both hands and chest, and it could be guessed that he had an extraordinary experience before, and when he asked him what good friends he had, he said angrily: "Those people are useless!" When you are rich and beautiful, they all stick to you, and when you are in trouble, there is no figure at all. "Yes, I agree, I have the same experience, and I believe many people feel the same way!

Originally, he could have been discharged from the hospital last night, when he contacted me last night, I asked him how to come to the center, he said that he drove by himself, he had a more stubborn personality and thought he could still drive, I was startled by him and quickly stopped him, I said: "Don't drive yourself at night, you stay in the hospital for one more night, and arrange grab to send you here this morning!" ,

Just now, at noon, I was sent from the hospital to the hospice center, and I saw that he had difficulty walking, how could he drive? Fortunately, he was obedient, otherwise he wouldn't know whether he hit someone or someone hit him.

When talking about his situation, he held my hand several times and said, "Thank you, you are really kind, and good kindness will be rewarded." Hearing him say this, I could only nod in agreement with him, but I was puzzled in my heart with a bloody heart and a wry smile, is kindness really rewarded? ? Yiai's current economy has been exposed, donations are much less, and there is a serious shortage of operating funds, which is the cause 😞 of frequent insomnia recently. In any case, welcome Ah Can's arrival, hope he has a good rest, and hope that he will get used to it.....

Advantage and disadvantage of this website

Advantage	Disadvantage
• Clear Donation Instructions. The website offers bank account information, making it simple for anyone to make a donation over the counter or through online banking.	• No Online Payment Options. The website is less convenient for younger or foreign donors because it does not accept online payment methods like credit cards, FPX.
• Direct Bank Transfer Reduces Middlemen. There are fewer middlemen involved because donations are made directly through bank transfers, which reduces transaction costs and guarantees that more money goes to philanthropic causes.	• No Instant Confirmation. Because the website lacks a real-time confirmation system, contributors frequently have to wait for the organisation to confirm the payment, which leaves them for a while.
• Clear contact and operation information. The website clearly displays the office, phone number, email, WhatsApp contact, essential personnel details, and operation hours.	• Inconvenient for recurring or micro-donations. Donors have to transfer the money every time if they wish to make monthly donation.
• Donors can watch actual actions, confirm authenticity, and stay up to speed on news and events thanks to the site's direct links to the organization's Facebook page and potentially other platforms.	• There is no comment section, donor feedback form, or personal donor dashboard on the website to monitor contributions or get updates. Donor satisfaction and involvement are hampered by this one-way communication.
• The organisation builds community trust and promotes word-of-mouth support by presenting their mission and donation methods in an honest and straightforward manner.	• There are very few graphics and mostly text on the contribution page. There aren't many images or videos that depict the impact or beneficiaries, which could emotionally attach visitors to the cause.

2.2 Problem Statement

Objective:

To establish a secure, transparent donation platform for donor tracking, multiple donation types, and real-time campaign updates.

Problem Statement:

Some existing donation websites lack transparency and tracking features, leaving donors unable to understand the specific use of their donations or review past donation records. This lack of functionality can lead many users to doubt the platform's credibility, reducing their willingness to donate or even completely refusing to do so.

Objective:

To increase charitable giving through a convenient system and raise community awareness/engagement in elderly care via storytelling and updates.

Problem Statement:

This donation process is not user friendly to the donors. Donors have to face too many steps which discourage them from making their donations. For example, they must fill out a lot of information every time and can't set up automatic monthly donations, so many people simply don't donate. Furthermore, people don't fully understand the conditions in nursing homes and the stories of the residents. Even if they donate, they don't know who they are helping or what difference it makes, which leads to a low level of interest in elderly care. We need a simple, easy-to-use website that makes it easier for people to donate and allows them to see the real stories and progress of nursing homes at any time. With this, it will make the organisation built trust, awareness and encourage more people to help.

Objective:

To develop a centralised digital platform for admin to manage donations and system.

Problem Statement:

The way donations are now handled online is disorganised and ineffective. Employees must utilise a variety of tools, including Google Forms, Excel sheets, payment apps, and paper records, which adds to their manual labour and raises the possibility of human error. These errors could compromise the accuracy of the data and damage the organisation's standing. Additionally, contributors find it challenging to trace their contributions and obtain digital receipts due to the absence of an integrated system. Complicated procedures also make it difficult for many people to set up recurring payments or make gifts. This diminishes openness and trust in the donation process in addition to deterring prospective donors. Furthermore, the administration of monetary and item-based donations (such food or everyday essentials) is still disorganised and lacks a methodical approach, which leads to ineffectiveness and low responsibility.

3.1 System Features

This is a proposed online donation platform that is specific to a charitable organisation that supports the elderly, disabled and children. The platform will be aimed at facilitating the process of donations, increasing the level of transparency, and establishing trust between the donors and the organisation. The following are the key features in an order of user role:

For Web-based:

- **Administrators (Admins)**
 - Can log in to the system
 - Can add or update the admin information
 - Can add or update the branches
 - Can view donors' profile details
 - Can view the donations of donors
 - Can update the payment type of donations
 - Can manage donation categories and funds
 - Can assign donations to specific funds or causes
 - Can feature or highlight urgent campaigns on the public website
 - Can manage all donation campaigns (add, edit, and delete)
 - Can send E-receipt to donors

- **Staff (Staff)**

- Can log in to the system
- Can view and update assigned activities and offline events.
- Can manage and verify offline item donations (record donor name, item details, quantity, etc.).
- Can upload and update event photos and reports.
- Can assist in donor management at physical events.
- Can update donation progress for events or campaigns.
- Can generate small-scale event or activity reports.
- Can add comments or notes for internal tracking.

- **Donors (Registered Donors)**

- Can log in to the system
- Can register for an account with personal detail
- Can recover the password by pressing forgot password
- Can view and edit their profile information
- Can view Homepage, About Us, Contact Us, News & Stories, Activities, and History pages.
- Can make donations
 - Can make one- time donation
 - Can make monthly recurring donation
- Can choose to donate
 - Can donate to specific special case (with donation progress bar)
 - Can donate to one of three branches (elderly home, orphanage, disability centre)
- Can view and manage recurring donation plan
 - Can edit deduction date
 - Can cancel subscription
 - Can download monthly PDF receipts

- Can earn points and badges through the donation
 - Can view and redeem points for the gifts that made by disabled people
 - Can make a quick button by using donate button
 - Can track donation usage through progress updates and reports
 - Can view and unlock the gamification achievement
 - Can view the amount of the donations and achievements in their dashboard
- Unregistered User (Visitor)
 - Can access public pages:
 - Home
 - About Us
 - Contact Us
 - Activities
 - History
 - News & Stories
 - Privacy & Cookies
 - Terms & Copyright
 - Can view donation cases and branch information but cannot make the donation.
 - Cannot make the donation and a pop-up alert appears prompting registration or login
 - Can view activity and campaign details to learn more about the organisation.

For Multimedia system:

- Home
 - Display the logo of the system
 - Quick navigation for registration, login and other function
 - Includes buttons for Donation
 - Shows future events and news highlights.
 - Contains links to the Terms, Privacy Policy, and Contact Information in the footer.
- Register
 - Enables new donors to register by providing personal information.
 - Email, IC number, and password strength forms for validation.
- Login
 - Enables safe login for administrators, employees, and registered donors.
 - Redirects according to the role of the user (donor, staff, or admin).
- Forget Password
 - Enables users to reset their passwords by contacting the administrator or sending an email.
- Profile
 - enables registered contributors to access and modify their personal information (name, phone number, email, address, and birthdate)
 - The ability to modify associated payment methods (bank, e-wallet).
 - Shows an overview of current award points, and total donations.
 - For account security, it has a "Change Password" feature.
- Branch Page

- Shows details about each branch (Disability Centre, Orphanage, Elderly Home)
- Money Donation
 - Enables one-time or monthly financial donations from registered users.
 - Offers a choice of branches or particular causes.
- Payment
 - Appears after the donor chooses the amount and kind of donation.
 - Displays the information about the donation (amount, campaign name, currency) and options for payment (bank transfer, e-wallet)
 - Verifies the data entered before to payment.
 - Shows the payment reference number and donation summary.
 - Automatically initiates the creation of a digital receipt upon successful payment.
 - After completion, it reroutes to the confirmation/thank-you page.
- Payment Settlement and Order
 - For Donors:
 - Highlights completed donations or things that have been redeemed.
 - Displays the amount, payment reference ID, and status ("Paid," "Pending," and "Failed").
 - The invoice or receipt can be downloaded.
 - For the administrator:
 - Able to see every donation transaction.
 - Able to monitor outstanding payments or bank settlements.
 - Able to export payment information for accounting purposes.

- Track Record
 - Shows the receipts, contribution history, and item redemption status.
 - Demonstrates the development of gamification and achievements that may be unlocked.
- Reward / Points
 - Shows the points received for each donation.
 - Enables the use of accrued points to redeem gifts.
 - monitors the progress of redeemed items' delivery.
- Recurring Donation Management Panel
 - Monthly donation plans can be changed or cancelled by donors.
 - Monthly PDF receipts are available for download.
- About Us
 - Describes organisation background, mission, vision, and goals.
- Contact Us
 - Contains contact form and social media links.
 - Users can submit messages to the centre admin.
- Activity
 - Displays a list of current and planned charitable activities.
 - Contains pictures, descriptions, and information about participation.
- History
 - Shows prior contribution campaigns and events.
 - Contains brief descriptions and images.
- News & Stories
 - Displays updates, success stories, and articles from the centre.
- Special Case
 - Shows the progress meter and donation target in specific situations.
- Privacy and Cookies

- Describes cookie policies and data protection.
- Terms and Copyright
 - Shows the copyright notice and terms of service.
- Administrator Dashboard
 - Shows current statistics like:
 - Total amount of money received (one-time/monthly).
 - Number of employees and donors who are currently active.
 - Ongoing initiatives and their advancement.
 - Famous donation instances and top donors.
 - Shortcuts for managing campaigns, reports, and users.
 - Alerts for communications, system updates, or pending approvals.
 - Reports can be downloaded or exported as Excel or PDF.

3.2 Hardware/Software Requirements

3.2.1 For Developer

Category	Item / Tool	Purpose
Operating System	Window 11	For system development
Programming Language	HTML, CSS, JavaScript, PHP	For front-end and back-end development
Database	MySQL	For data storage
Web Server	Apache (XAMPP)	To host and test the web system
IDE	Visual Studio Code, Dev-C++	For coding
Version Control	GitHub	For version tracking and backup

3.2.2 For User

Category	Item / Requirement	Purpose
Device	Desktop, Laptop	To access the donation system
Browser	Google Chrome / Edge / Firefox	To open the web system
Internet Connection	Stable internet connection	For online donation and updates

3.3 Technical Diagram

3.3.1 Context Diagram & Data Flow Diagram
